

All Pupil II

Renowned optics in a durable, cost-effective, package

Keeler
— A world without vision loss —

All Pupil II

The Keeler All Pupil II is designed to provide ease of use combined with balanced comfort for regular use in a range of clinical applications through the binocular optical view used in conjunction with a condensing lens.

An Indirect Ophthalmoscope is an AC or battery-powered device containing illumination and viewing optics; and it is intended to be used to examine the cornea, aqueous, lens, vitreous and retina of the eye. The device is intended for use by a trained healthcare professional, and is mounted on the user's head.

Key features

- Renowned Keeler binocular optics
- Intuitive controls and quick adjustments for ergonomic comfort
- Optional range of product options to fit your clinical setup needs
- Go Wireless patented technology leaves you free to move around without any wire or cord constraints
- Lightweight and comfortable, weighing just 520 grams with extra padded materials

Light, bright and easy to use

Trusted globally,
with a refined design

Make your examinations easier and more comfortable

Utilising the same renowned Keeler optics as the Vantage Plus, the All Pupil II provides ease of use and comfort, from once a day to regular usage for a range of clinical applications.

The All Pupil II has been specifically designed as a durable, cost-effective solution without sacrificing on the optical quality.

Filters and Apertures

P D Range: 47 - 75mm

Outstanding brightness for difficult examinations

With 2000 lux of light, which can be turned down to 2% of total illumination when necessary, the All Pupil II offers maximum illumination with total control.

Simple controls

The All Pupil II has a unique single control to change aperture size and position in one movement to view through all pupil sizes.

IR and UV barrier

There is a built in full time IR and UV barrier which guarantees improved patient protection and safety.

All Pupil II LED light source

Plugs simply into the back of the All Pupil II for brighter, whiter illumination and freedom from purchasing bulbs. The LED life expectancy is up to 10,000 hours and it has a 5 year warranty.

Wide angle diffuser

The Keeler wide angle diffuser eliminates shadows on the edge of the condensing lens expanding the field of view significantly, particularly useful during difficult and peripheral examinations. There is also less discomfort for the patient because the light is softer.

Teaching Mirror

The teaching mirror just slides on and off with ease allowing two observers to view the retina at the same time.

Wireless Power Supplies

Keeler wireless technology allows you to move from room to room without any constraints. The chargers are either desktop or wall mountable and store an extra lithium battery as a back up, should you need it.

Slimline Lithium Polymer Battery
(paper clip shows scale)

Slimline Lithium Polymer Battery

The New Slimline Lithium Polymer battery can give you up to 6 hours of use, weighs only 53 grams, and is nearly 70% lighter than the standard battery. It is also much smaller and can fit nicely into the palm of your hand.

Slimline Wireless Charger

The new wall mountable charger remains as durable as the Standard Wireless battery charger with the facility to store your extra battery in the top compartment. The charger has an easy release button to remove your extra battery.

Slimline Wireless Charger

Lithium Battery

Slimline Lithium
Polymer Battery

Slimline Lithium Polymer Battery

Standard Lithium Battery

Our original lithium battery lasts up to 11 hours of use and fits neatly into the charging unit.

Standard Wireless Charger

The Standard Wireless Charger can be wall or desk mounted with space for a spare battery, which means you will always have a back up. An LED indicates when the battery needs charging.

Wired Power Supplies

SmartPack

SmartPack is a stylish power supply system that combines 3 options in one product.

No longer will you need to purchase a portable system for domiciliary use, another system for mounting on your wall and another for tabletop use.

WallPack

Alternatively, if your power supply needs to be stationary you can purchase the WallPack which fits neatly on the wall. Your indirect can be mounted on the bracket it comes with.

All Pupil II Overview

The Keeler All Pupil II is a head-mounted indirect ophthalmoscope, designed to provide ease of use combined with balanced comfort for regular use in a range of clinical applications through the illuminated binocular optical view.

This is intended to be used in conjunction with a condensing lens as prescribed through indirect ophthalmoscopy techniques to illuminate and examine the fundus.

This equipment is to be used only by a healthcare professional.

More Keeler Instruments

With over 100 years of industry experience, Keeler has become a household name among optometrists and ophthalmologists worldwide.
