Drummond Pipet-Aids enable *User-Specific* productivity

Drummond Scientific pioneered the development of electronically controlled pipettors. The original Pipet-Aid created a new level of safety in the laboratory by eliminating the need for mouth pipetting. Over the years we have responded to the needs of our customers with superior service and new designs that offer performance and ergonomic features to make the job easier, safer, and more productive.

EZ Grip Tissue Culture Nosepiece

The Drummond EZ Grip Tissue Culture Nosepiece eliminates the possibility of cross-contamination due to over-pipetting. It incorporates a dual hydrophilic 0.8 μm , hydrophobic 0.8 μm filter which prevents further use once contaminated by fluid.

This double membrane filter provides a barrier to particles as small as 0.1 μm . Each kit contains all necessary parts including four filters. Extra filters may be ordered separately.

Cat. No.	Description
4-000-050	EZ Grip TC Nosepiece Kit with four Self-locking Filters
4-000-051	Self-locking TC Filter 5/pk
4-000-051-S	Sterile Self-locking TC Filter 5/pk
4-000-052	Self-locking TC Filter 50/pk

Portable Pipet-Aid® XP2

The Evolution of Xcellence Continues

- New Ergonomic Design—The most comfortable pipettor you ever laid a hand on
- New Power Source for Uninterrupted Extended Operation—Can be charged while in use
- New Ultra Quiet Precision Pump—Great control for aspiration or dispensing

The new Drummond Pipet-Aid XP2 advances the industry standards for pipetting **comfort**, **convenience**, and **control**. Building on the years of experience of providing state-of-the-art tools that make your job in the laboratory safer, easier, and more convenient, the Pipet-Aid XP2 delivers more. The ergonomic design is more comfortable to handle. The new power source enables more convenient extended operation and the new more powerful pump provides great control and quieter operations. The unit is supplied complete with a power supply/charger, 4 extra filters, and a removable stand.

Specifications

Size 5.5"
 Weight 7.2 oz.

Portable Pipet-Aid® XL

Watch XL in Action

New Ergonomic Design Reduces Fatigue When Pipetting Under a Hood

- Longer lightweight handle lowers your arm position to reduce head, neck, and upper arm strain
- New quiet, more efficient pump reduces noise and extends operation period between charges
- Can be charged while in use to eliminate downtime
- Three-speed settings provide more precise control for both aspirate and dispense modes

Pipetting under a hood doesn't need to be a pain in the neck. The new Drummond Portable Pipet-Aid XL has a longer handle to reduce the amount of arm lift required to perform the same operation as with a conventional pipettor. The ergonomic design includes an adjustable sliding hand rest and a removable stand which enables the unit to be set down without contaminating the pipet. The Portable Pipet-Aid XL also features a new quieter, more powerful pump, and a new EZ Grip nosepiece. The unit is supplied complete with power supply/charger, 4 extra filters, a holster-type wall bracket, and a removable stand.

Portable Pipet-Aid® XP

- The lightweight, compact Portable Pipet-Aid®
- Three-speed settings provide more precise control for both aspirate and dispense modes
- Easy access battery replacement
- EZ Grip nosepiece with double membrane filter
- Removable stand
- Holster-type wall bracket included

Specifically designed to minimize operator fatigue, the Portable Pipet-Aid XP is smaller and lightweight. It accepts most pipets from 1 to 100 mL.

Each aspiration and dispense button has three speeds, (F) Fast, (M) Medium, (S) Slow. The medium speed is suitable for most routine techniques. *Fast* speed can deliver up to 50 mL in 5 seconds and can be used for rapid filling of large pipets or breaking up cell clumps. *Slow* speed is ideal when using small pipets or when more precise delivery is required. A gravity drain model is available which substitutes a gravity drain (G) function for the fast (F) mode on the dispense button.

The XP is powered by a 9 volt (Ni-MH) rechargeable battery.

A Tissue Culture Nosepiece, which features a unique filter element, will cease to allow air to pass in either direction if it becomes wet, alerting the user to possible contamination of the rubber insert.

Specifications

Size	5.5"
Weight	7.5 oz.
Capacity	Accepts 1 to 100 mL pipets
Battery	9 Volt Ni-MH

Cat. No.	Description
4-000-101	Portable Pipet-Aid XP supplied complete with 110V recharger plus four replacement filters
4-000-201	Same as above but 230V, CE, Euro
4-000-201-E	Same as above but 220V, CE, UK
4-000-102*	Portable Pipet-Aid XP with Gravity Drain, 110V
4-000-202*	Portable Pipet-Aid XP with Gravity Drain, 230V, CE, Euro
4-000-202-E*	Portable Pipet-Aid XP with Gravity Drain, 220V, CE, UK

U.S. Patent Numbers: 5,214,968, 5,616,871, 5,294,405

***Gravity Drain Feature:** The lower EMPTY button can be rotated to provide the user with three dispensing options (S = Slow; M = Medium; G = Gravity Drain). When the empty button is rotated to "G" the pump will not be activated. The fluid will drain by gravity (commonly used with volumetric pipets).

Replacement Parts

Original Portable Pipet-Aid®

- Pipets over 2000 times without recharging
- Flow rate better than 25 mL at 5 seconds with 100 mL pipet
- Cordless convenience
- Tissue Culture Nosepiece provides quick disconnect and easier assembly
- Holster-type wall bracket included

Used by millions of technicians all over the world, the Portable Pipet-Aid has earned a well-deserved reputation for reliability and durability in the laboratory. The filtered, failsafe nosepiece provides positive protection for the electronic components and prevents cross-contamination due to over-pipetting.

Pipet-Aid® Hood Mate®

- Longer 6' coiled hose
- Extremely lightweight (4.3 oz.) handle provides nine fill and empty speed settings and proportional fingertip control
- Never needs recharging—handle holder incorporates “auto-off” feature
- Energy saving “auto-off” feature automatically shuts unit off after 3 minutes of nonuse
- Compact, convenient, and won't walk away. Dedicated pump housing attaches to hood wall which saves space and prevents spills
- Coiled vacuum/pressure line entering handle from the top prevents accidental knocking over of bench items

The Drummond Pipet-Aid Hood Mate is specifically designed for convenient, comfortable pipetting under a hood. The Pipet-Aid Hood Mate can deliver precise volumes with exact control. This new unit is lightweight, never requires recharging, and won't walk away from your workstation. All materials of construction are UV resistant.

Original Pipet-Aid®

- Available with or without EZ Grip TC filter nosepiece
- Available with dual pump filtration unit for use with biohazardous materials
- Can be used with glass or plastic pipets
- Autoclavable components

The Drummond Pipet-Aid set the standard for a convenient alternative to mouth pipetting in the laboratory. A patented, easy-to-use volume control mechanism permits precise fluid intake and delivery.

A check valve protects against accidental fluid intake into the handle and optional Tissue Culture Nosepiece will prevent cross-contamination due to over-pipetting. A special filtration unit for use with biohazardous materials is also available.

Cat. No.	Description
4-000-110	Pipet-Aid, Plain, 110V

Pipet-Aid® Dual Pump Filtration Unit

For use in a biohazardous environment, a filtration unit can be installed on the Pipet-Aid pump which will filter both vacuum and pressure lines. Incorporating dual filters, the Pipet-Aid Biohazard Filter Kit has a retention efficiency of 99.9999+% for 0.1 micron particles and droplets.

Normally factory installed, the Filter Adapter Kit can be attached to existing unfiltered Pipet-Aid pumps.

Nanoject III Programmable Nanoliter Injector

The Next Generation in High Precision Nanoliter Microinjection

- **User-Friendly Programmable Touchscreen Operation** – Potential Applications Expanded
- **Easy Positive Micropipet Attachments** – No O-Rings Required
- **Proven Hydraulic Technology** – Ensures Accurate and Consistent Injection Volumes
- **Universal Power Source** – Supplied with 4 Interchangeable Adapter Plugs

The new Drummond Programmable Nanoject III Nanoliter Injector offers a number of state-of-the-art features to provide easy setup* and operation as well as more accurate injection volumes down to 0.6 nanoliters. The Nanoject III does not require any O-rings to secure the micropipet. Operational Modes enable the user to program the unit to do single manual injections, as well as multiple injection cycle recipes. Program input and execution is enabled by prompted touchscreens located on the control box. Programmability, the lower injection volume capability plus the user's ability to select the injection rate widens the potential range of applications for the Nanoject III. The Universal Power Source provides adapter plugs to enable the unit to be used in the US, UK, Europe, and Australia simply by inserting the proper plug.

Specifications

Power Source	100-240 volt, 50/60 Hz
Total Sample Volume	4.2 μ L
Fill/Empty Speed	10-200 nL/sec
Injection Volume Range	0.6 nL-999.9 nL
Injection Rate	1 nL/sec-200 nL/sec
Plunger Travel	23 mm
Glass Micropipet Dimensions	OD 0.045" (1.14 mm) ID 0.021" (0.53 mm)

Nanoject III Accessories – not shown

Cat. No.	Description
3-000-032	Foot Switch – remote capability for fill, empty and inject functions (Nanoject III only)
3-000-025-SB	Support Base
3-000-024-R	Micromanipulator, right hand
3-000-024-L	Micromanipulator, left hand

Nanoject II vs. Nanoject III Capabilities

Nanoject II	Features	Nanoject III
3-000-204, 110V	Catalog number, 110V	3-000-207
3-000-205A, Euro.	Catalog number, European plug	3-000-207
3-000-206A, UK	Catalog number, UK plug	3-000-207
2.3 nL-69 nL	Injection volumes	0.6 nL-999.9 nL
46 nL/sec.& 23 nL/sec. only	Rate of injection	1 nL/sec.-200 nL/sec.
No	Injection counter	Yes
No	Programmable multiple injections	Yes
No	Programmable frequency between injections	Yes
No	Program storage capability	Yes, 8 programs
No	Auto HOMING of plunger	Yes
3 O-rings, replacement necessary	Micropipette attachment	No O-rings, new chuck simplifies micropipette attachment
10 µm minimum	Micropipette I.D. size	2-3 µm minimum
Yes; inject only	Optional Footswitch	Yes; fill, empty and inject capability
No; fill, empty, inject buttons only	Color, Touch Sensitive Keypad	Yes; multi screens

Both units utilize the same glass capillaries for pulling micropipettes. Due to the new improved method of securing the micropipette, smaller tips can be pulled and utilized on the Nanoject III. *No O-rings to wear out.* A micro “chuck” is used, and it simplifies attachment of the micropipette once backfilled with oil.

The auto HOMING feature will eliminate the need to “rehome” the unit as in the Nanoject II and this will reduce if not totally eliminate jamming of the plunger.

**Have a question or would like additional information on the Nanoject III?

Nanoject II™ Auto-Nanoliter Injector

- Automated microprocessor controlled Microinjection Pipet delivering precise nanoliter volumes accurately
- Remote control and nonrotating plunger eliminates vibration allowing precise injection minimizing possible cell rupture

Nanoject II offers these exceptional features

- Selectable Injection Volumes: from 2.3 nanoliters to 69.0 nanoliters in 16 increments
- Selectable Operating Speeds:

Fill Speed	Fast	46 nL per second
	Slow	23 nL per second
Injection Speed	Fast	46 nL per second
	Slow	23 nL per second
Empty Speed	Fast	230 nL per second
	Slow	92 nL per second
- Supplied with sufficient borosilicate glass capillaries for preparing 400 injection tips, standard softening point 780°C
- Can be mounted on most micromanipulators
Note: Universal Adapter 3-000-024-A supplied with unit
- Separate Foot Switch available to allow hands-free operation (see page 14)

The Drummond Nanoject II Auto-Nanoliter Injector is specifically designed to perform ultra-delicate nanoliter injection procedures into oocytes, embryos, and tissues.

Each Nanoject II Auto-Nanoliter Injector comes complete with 200 borosilicate capillaries that can be pulled to the required tolerance together with a backfilling* needle and O-ring kit.

Power Supply with Universal Adapters

Cat. No.	Description
3-000-204	Nanoject II Variable Volume (2.3 to 69 nL) Automatic Injector with Glass Capillaries (110V)
3-000-205A	Nanoject II, 100 - 240V, 50/60 Hz, CE, Euro
3-000-206A	Nanoject II, 100 - 240V, 50/60 Hz, CE, UK

Note: Universal Adapter supplied with all the above units

Nanoject II Replacement Parts

Cat. No.	Description
3-000-002-KN	O-Ring kit for Models 204, 205A, and 206A includes: 1 collet, 1 small O-Ring, 1 spacer, 1 compression O-Ring, and 1 Allen wrench
3-000-027	30 gauge, 2" Backfilling Needle
3-000-000-203-X	Pointed Plunger Wire

Recording Nanoject II™

Enables High Precision Electrophysiological Guidance of Nanoliter Injections into the Brain

- Facilitates connection to an extracellular amplifier to allow recording of neural activity
 - Supplements stereotaxic coordinates in guiding the placement of small injections
 - Provides direct displacement of neuronal tracer or excitotoxin from the pipet
 - Can be used on stereotaxic equipment utilizing 7.9 mm clamps
- Note: Universal Adapter 3-000-024-A supplied with unit**

The Drummond Recording Nanoject II was specifically developed to improve micro-volume injection techniques used to study connectivity and function of specific brain nuclei. Designed to be operated in conjunction with an extracellular amplifier, the integrated system can be used to reliably place small volumes into targeted areas. The Recording Nanoject II is engineered to easily mount on popular stereotaxic instruments.

3-000-203-G/XL	1.14	7"	0.53	100

Manual Oocyte Microinjection Pipet

- Nonrotating plunger eliminates tip wobble, allows more precise deposition
- Inject volumes of 30 nanoliters or more with reproducible accuracy, drives oil interface with minimal or no overshoot
- Utilizes pulled capillary tips, supplied with 100 8" glass capillaries sufficient for preparing 200 tips. User must pull their own tips.

Cat. No.	Description
3-000-510-X	Oocyte Pipet with 100 8" Glass Capillaries

Oocyte Microinjection Pipet Replacement Parts

Cat. No.	Description	Pack
3-000-210-G	Replacement Glass 3.5"	100
3-000-210-G8	Replacement Glass 8"	100
3-000-027	30 gauge, 2" Backfilling Needle	1
3-000-002-K10	O-Ring Kit, Model 510-X	1
3-000-000-210-X	Wire Plunger	1

Sequencing Pipet

- The first variable volume Microdispenser designed for DNA sequencing operations
- Two tapered polycarbonate tips available (.34 mm O.D. and .19 mm O.D.) to provide precise nanoliter sample delivery into narrow (.35 mm and 0.2 mm) gel slots
- Noncontact plunger and replaceable autoclavable tips
- Volume range: .25 μ L to 3 μ L

The Drummond Gel Sequencing Pipet is engineered to overcome sample delivery problems typical of DNA sequencing operations.

Cat. No.	Description	Pack
3-000-203	Gel Sequencing Pipet Supplied with six .34 mm Bores	1
3-000-203-G	Replacement Bores .34 mm	10
3-000-203-G/.2	Replacement Bores .19 mm	10
3-000-002-K3	O-Ring Kit, Model 203	1

Positive Displacement Digital Microdispensers

- Direct digital set and readout for fractional microliters
- Positive lock prevents accidental volume changes
- Repeat Kit available for Model 590 and 390
- Overall volumetric accuracy of $\pm 1\%$ (at full volume)
- Borosilicate glass bores with stainless steel plungers, (PTFE tips on all plungers 25 μL or larger) polypropylene bore on Models 590 and 390

Cat. No.	Total Capacity (μL)	Recommended Range (μL)	Delivery Increments (μL)

Stainless Steel Manifolds for Microtest Plates

Feed, Rinse, or Aspirate Multiple Plate Positions Quickly and Easily

- Autoclavable stainless steel and PTFE construction
- Use for both sample delivery and aspiration operations
- Supplied complete with cleaning wire for easy cleaning
- Positive Luer lock connection
- Custom manifolds available

Repeat Kit with Valve

- Adapts to Models 390 and 590 for continuous pipetting operations
- Each kit contains: Microvalve, Three-way Valve, Stainless Steel Sinkers, 30" Tygon® Tubing 3/32" I.D., Luer Pipet Tips, and 7 Polypropylene Tubing Connectors

Cat. No.	Description
3-000-091	Repeat Kit (includes valve)

Dialmatic Microdispenser

- Adjustable, direct reading plunger sets volume
- Delivery scale engraved on plunger shaft
- Fractional deliveries possible with premarked indexes
- Volumetric accuracy of ±1% (at full volume)
- Borosilicate glass bores with stainless steel plungers, (PTFE tips on all plungers 25 µL or larger)

Cat. No.	Total Capacity (µL)	Recommended Range (µL)	Delivery Increments (µL)
3-000-210	10	2.0 to 10	1

Special Sample Collection Tubes

- Single use, disposable glass capillary pipets with hydrophobic plug preset to precise volume delivery
- Plug controls volume and serves as a piston which dispenses sample when pressed downward by reusable plunger
- Once used Aqua-Cap cannot be used again, eliminates any potential cross-contamination
- Available in the sizes below in packages of 100
- 5 Plungers/Vial

Cat. No.	Description	Color Code	Qty.
7-000-0500	Aqua-Cap, 50 µL	Green	100 pcs/5 plungers
7-000-0650-LHC	Aqua-Cap, 65 µL	Blue	50 pcs/50 plungers Lithium heparin clad

OEM Custom Glass and Plastic Capillary Tubing

Precision Micro Liquid Transfer Components Produced to Specifications

Drummond Scientific specializes in the production of glass, plastic, and plastic coated capillary tubing for a wide range of scientific and clinical OEM applications. Our unique manufacturing capability and technical expertise can also be applied to your specialized liquid sample transfer product or kit requirement. For more information please call.

Calibrated Micropipets

- Fire polished
- Accuracy of $\pm 0.5\%$
- Color coded Micropipets with sizes imprinted
- Anticoagulant treatment for clinical applications (special limited sizes)

Superior quality, Drummond precision Calibrated Micropipets are available in sizes ranging from 1 to 200 microliters. Ideal for a variety of liquid transfer work, 250 color coded micropipets, plus one 15" aspirator tube are supplied in a conveniently designed, easy-to-store cylinder. For blood transfer work, a heparinized 44.7 microliter pipet is also available.

Wiretrol® I

- Economical positive displacement micropipet with fingertip control
- Ideal for a wide variety of applications
- 100 glass micropipets and 1 reusable plunger
- ±1% accuracy

The Drummond Wiretrol provides the accuracy and high speed action generally found in expensive microdispensers at a fraction of the cost. A unique combination of a disposable precision bore calibrated micropipet and a stainless steel plunger with fingertip handle, the Wiretrol will accept both high and low viscosity liquids including corrosives.

Cat. No.	Sizes (µL)	Color Code	Pack
5-000-1001	1 to 5*	White	100
5-000-1003	3*	Yellow	100

Microcaps®

- The original, disposable Drummond Microcap
- The most accurate ($\pm 1\%$)¹
- The most dependable
- The easiest to use micropipet available anywhere!

Drummond Microcaps are a fast, safe, clean, and accurate way to transfer liquids in micro quantities. They are precision-bore glass capillary tubes cut to predetermined lengths so that fill volumes are constant and precise. Microcaps are inexpensive and disposable.

Using a Microcap is simple. Capillary action draws the fluid into the tube and a squeeze of the bulb will dispense it. For spotting applications such as TLC, a unique spotting holder is available which will allow the liquid to be dispensed simply by touching the tube to the spotting surface.

100 Microcaps and one Bulb Dispenser included.

¹Volume 45, No. 8, Analytical Chemistry, Carl F. Emanuel

Bulb Dispensers

Cat. No.	Description	Pack
1-000-9000	Bulb Dispenser	1 ea.
1-000-9003	Silicone Tips	3

PCR Pipets

- Disposable, positive displacement micropipets with stainless steel plungers
- Measure true sample volumes regardless of viscosity, eliminates contamination from residual aerosols
- Decontaminate at temperature of 400°F or higher

Cat. No.	Description	Pack
5-000-1001-X	5 µL PCR Pipet	100 Glass Micropipets/100 Plungers
5-000-1001-X10	10 µL PCR Pipet	100 Glass Micropipets/100 Plungers

Bulb Dispenser with Microcap Inserted

*Available in 5-Pack (1-000-125-K); includes one vial each of 1-000-0005, 1-000-0010, 1-000-0020, 1-000-0050, and 1-000-0100.

HEMATO-CLAD® Mylar® Wrapped* Hematocrit Tubes

HEMATO-CLAD Hematocrit Tubes combine the precision of glass with the safety provided by a Mylar overwrap. Now, for the first time, you can give your laboratory staff enhanced safety with no compromise in accuracy. With HEMATO-CLAD Tubes the chance of contamination due to glass fragments or aerosols is greatly reduced. Accidental breakage is significantly reduced particularly when pressing the tube into sealing clay. In the event of breakage, the Mylar wrapping will help contain the sample (blood) and provides an added layer of protection against cuts from broken glass.

Note: HEMATO-CLAD Mylar Wrapped Hematocrit Tubes comply with FDA, NIOSH, CDC, and OSHA safety recommendations for the use of capillary tubes for blood collection.

Cat. No.	Description	Package Size
1-000-7500-C/5	Plain (Blue)	1000/Case
1-000-7500-HC/5	Heparin Coated (Red)	1000/Case

Cases are comprised of 5 vials with 200 capillaries each.

*Patent Number 5,173,266

Plasticrit Plastic Hematocrit Tubes

Plasticrit Plastic Hematocrit Tubes provide the identical capillary action as glass hematocrit tubes. They eliminate the possibility of contamination due to breakage with no compromise in accuracy. These 75 mm polycarbonate pipets are available plain or heparinized.

Note: Plasticrit Hematocrit Tubes comply with FDA, NIOSH, CDC, and OSHA safety recommendations.

Cat. No.	Description	Package Size
8-000-7520/5	Plain	1000/case
8-000-7520-H/5	Heparin Coated	1000/case

Cases are comprised of 5 vials with 200 capillaries each.

Mylar is a registered trademark of DuPont

Ordering Information

Where to Order

All of the items listed in this catalog are available through most major laboratory supply distributors. For a list of dealers, either call Drummond or refer to our web site (www.drummondsci.com) for a complete list.

Drummond Scientific Company, 500 Parkway, P.O. Box 700, Broomall, PA 19008
800/523-7480, 610/353-0200, FAX: 610/353-6204

Shipping

Unless specified, most Drummond products are shipped by UPS or FedEx, FOB Broomall, PA.

Terms: Net 30 days with established credit.

Returns

Returns are accepted prepaid, with prior authorization and are generally subject to a 15% restocking charge.

Export Orders

Drummond maintains a select group of foreign stocking dealers and/or can be of immediate assistance for foreign shipment. Refer to our web site for a list of our foreign dealers.

O.E.M.

Drummond is a major supplier of private labeled liquid handling equipment worldwide. We welcome the opportunity to discuss development and production of new items or adaptations of existing products.

Nanoject III
The Smallest
Big Deal in
Microinjection

Completely programmable
nanoliter injection control
expands your capabilities

- User-friendly touchscreen setup for single injections as well as multi-line injection cycle routines
- Advanced hydraulics deliver precise, consistent injection volumes down to 0.5 nanoliters
- Improved chuck design provides simple, accurate micropipet attachment without the need for O-rings

Go to injection.expert for more details about Nanoject III expanded microinjection capabilities.
