EFFICIENCY BY DESIGN

IQ
spiro

IQ
spiro

In the United States, a patient dies from COPD every four minutes. It's the third leading cause of death, with 12.7 million people estimated to have the disease and close to 24 million Americans showing evidence of the impaired lung function.*

The IQspiro® Digital Spirometry System makes detection at the primary care level simple and effective.

Increase efficiency and improve patient care within your existing workflow

Speed, accuracy and ease of use make the IQspiro a cost-effective device for detecting and managing pulmonary disease – but the benefits don't end there. Talk to a Midmark representative today to see how effective and economical it can be to add spirometry testing to your patient care strategy whether you're a single practitioner or part of a larger physician group.

1 Preparing the test is as easy as retrieving the patient data from the EMR system or IQmanager software.

2 Patient coaching is made easier with a choice of easy-to-see incentives on full screen (image: candles).

SIMPLE & EFFECTIVE IN-OFFICE TESTING

IQspiro Digital Spirometry System

The IQspiro from Midmark combines a digital spirometer with a Windows® based software solution that makes it fast and easy to capture, interpret and review patient test information.

- Accurate and reliable – meets or exceeds ATS 2005 Standards
- Easy grasp, lightweight design makes testing comfortable for adult or pediatric patients
- Ergonomic, T-shaped design promotes correct patient positioning during testing
- Unique eject lever alleviates handling of used mouthpieces
- Easy-latch door design improves mouthpiece stability and protection
- USB connection requires no battery to operate

- View real-time Flow/Volume Loop and Volume/Time graphs with fully customizable parameters
- Pre- and post-bronchodilator testing with automatic interpretation
- Trend patient's test measurements over time in graphical and tabular formats
- Easy to print full page reports on standard paper
- Use with today's top EMR systems or as a standalone device with IQmanager®

Save test results directly to the EMR. Visit the Technical Support page on midmark.com for a complete list of our EMR partners.

4 Detailed test results with auto interpretation help clinician diagnose patient's lung health accurately.

3 Avoid contact of used mouthpieces during disposal while test results are being saved directly to the patient's records.

RETHINK THE CLINICAL SPACE

At the core of Midmark is a new way to think about caregiver/ patient interaction and the delivery of efficient patient care. We are dedicated to working together with you to redefine the future of the clinical space.

midmarkclinicalsolutions.com

IQconnect™ Framework

IQconnect is a cutting-edge, flexible, scalable integration framework designed to seamlessly connect Midmark diagnostic solutions, including ECG, Holter, spirometry and vitals with EMR systems or IQmanager software. It also enables you to receive future software updates directly from Midmark, shortening the time from release to implementation. The latest Midmark EMR specific connectivity software and IQmanager are built on this new IQconnect framework.

And if you are using a thin-client network, Midmark IQpath® software reduces latency issues and smooth data flow for uninterrupted ECG, spirometry and vitals testing.

Software and License Required

To ensure optimal performance of Midmark digital diagnostic products, we encourage you to contact us to see what software you will need, software licensing information and detailed system requirements.
