

Pediatric Examination Table

640

The most tender care possible

Weigh, measure and examine infants safely and securely in one location. The Midmark 640—because your patients deserve the most tender, loving care.

Weighing infants can be efficient and accurate using the Midmark 640 with integrated scale. Press the Zero/On button and within seconds the scale display will read, "Scale ready." Place the infant on the scale and the weight will be automatically displayed. When you want to measure the patient, simply pull out the infantometer and slide it back into place when finished. Additional features include:

Reweigh allows you to recapture weight with the press of a button—no need to pick the infant back up.

A surface height of 36 inches provides easy access and reduces the need for repeated bending during the exam.

Upholstered end panels, beveled sides and flat surfaces with no sharp edges help ensure patient safety.

For storage needs, there is an oversized drawer as well as a bulk storage area designed for keeping diapers and equipment.

A hidden paper roll holder with a paper tear strap at one end adds convenience.
