PCR solutions made for what you aspire to achieve

In your pursuit to advance science, every experiment matters. There's no time to start again, no need to wonder if the products you chose will set you back or propel you forward. With our comprehensive portfolio of thermal cyclers, PCR plastics, reagents, and service plans, you know exactly what you're getting—quality made to support your every win, big and small, at every step.

Which instrument fits your needs?

Providing precise, consistent results, Applied Biosystems™ thermal cyclers are designed for every challenge, application, and budget. Be confident in your results with instruments designed for reliability, accuracy, and intuitive programming. Reduce time spent on PCR optimizations with Applied Biosystems™ VeriFlex™ Block temperature control technology. Manage your instruments remotely with secure access.

Ultimate flexibility and throughput

ProFlex PCR System

The Applied Biosystems™ ProFlex™ PCR System combines flexible configuration and control features to fit how you work today and tomorrow with the reliability you've come to expect from Applied Biosystems™ products. Interchangeable block formats allow you to maximize your throughput or run independent experiments concurrently.

The ProFlex PCR System is cloud-enabled, giving you the freedom to design and securely upload your methods, monitor runs, and check instrument availability from any mobile device or desktop computer with the Thermo Fisher™ Connect Platform.

- **Multi-user accessible**—run three experiments at once
- **Flexible block configuration**—accepts five different block formats for optimization and throughput
- **Cloud-enabled**—conveniently access your instrument anytime, anywhere with the Connect Platform
- **Fleet control-compatible**—manage multiple instruments, users, and methods with Applied Biosystems™ Thermal Cycler Fleet Control Software

Five interchangeable block options

The ProFlex PCR System has five different blocks that can be changed with the flip of a switch, including a 3 x 32-well block. This allows up to three experiments to be run simultaneously, completely independently of each other.

Dual 96-well and dual 384-well blocks are available for high-throughput needs. A dual flat block is also available to support Applied Biosystems™ OpenArray™ plate technology for genotyping analysis on the Applied Biosystems™ QuantStudio™ 12K Flex Real-Time PCR System as well as our sealed-chip technology on the QuantStudio™ 3D Digital PCR System.

Did you know?

The ProFlex, VeritiPro, and SimpliAmp Thermal Cyclers feature VeriFlex temperature control technology, which enables more precise and efficient PCR optimization.

Find out more at thermofisher.com/veriflextechnology

Ultimate performance

VeritiPro Thermal Cycler

The Applied Biosystems™ VeritiPro™ Thermal Cycler delivers proven reliability with advanced temperature control technology and connectivity. Take advantage of next-level PCR optimization with the precision offered by VeriFlex temperature control technology. Connect to the cloud-enabled VeritiPro Thermal Cycler remotely. Conveniently design and securely upload your methods, monitor runs, and check instrument availability from any mobile device or desktop computer with the Connect Platform.

- **Innovative design**—ramp rate of 6.0°C/sec, quiet fan, and ergonomic soft-close lid
- **VeriFlex Block**—precise control over six independent temperature zones for PCR optimization
- **Fleet control-compatible**—manage multiple instruments, users, and methods with Thermal Cycler Fleet Control Software

 = cloud-enabled instrument

Precise control with VeriFlex temperature control technology

VeriFlex Blocks are constructed of segmented metal blocks with separate heating/cooling elements below each, enabling:

- **More precise control over PCR optimization**—each block can be set with up to six specific temperatures
- **Precise incubation**—use the six temperature zones of the VeriFlex Block to do enzyme studies, restriction digests, or any other process that requires precise temperature control

Find out more at thermofisher.com/veritipro

Tired of water baths?

Incubate samples at up to six different temperatures simultaneously for enzyme activation studies, restriction digests, or sequencing library preps with the VeritiPro Thermal Cycler.

Elegantly simple and precise

SimpliAmp Thermal Cycler

The SimpliAmp Thermal Cycler is an easy-to-use, compact, and accurate thermal cycler designed to fit every lab's essential PCR workflow. Features like a responsive color touchscreen and VeriFlex temperature control technology enable simple, accurate optimization. Plus, the SimpliAmp Thermal Cycler is cloud-enabled, giving you the freedom to design and securely upload your methods, monitor runs, and check instrument availability from any mobile device or desktop computer with the Connect Platform.

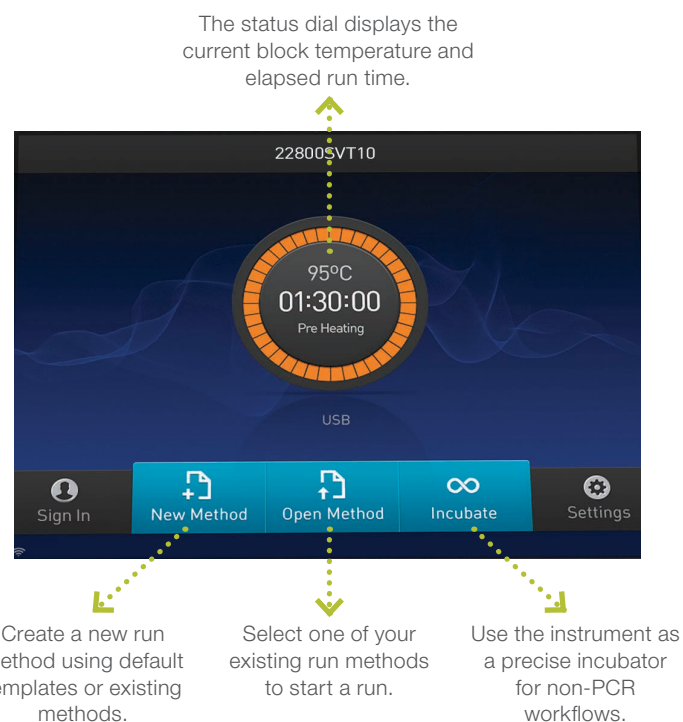

- **Intuitive interface**—large, easy-to-use color touchscreen for easy programming and quick status checks
- **VeriFlex Block**—three independent temperature zones for PCR optimization
- **Cloud-enabled**—conveniently access your instrument anytime, anywhere with the Connect Platform
- **Compact design**—helps save bench space
- **Fleet control-compatible**—manage multiple instruments, users, and methods with Thermal Cycler Fleet Control Software

Simple, intuitive user interface

The SimpliAmp Thermal Cycler has an 8 inch color touchscreen, making navigation of the intuitive menu options fast and efficient.

Did you know?

ProFlex, VeritiPro, SimpliAmp, and MiniAmp Thermal Cyclers have thermal simulation modes that make the transition from other thermal cyclers simple, accurate, and efficient. A library of modes that mimic the ramp rates of other instruments is available on each instrument.

Routine PCR

MiniAmp Thermal Cycler

The Applied Biosystems™ MiniAmp™ Thermal Cycler delivers the reliability you've come to expect from Applied Biosystems™ technology for routine PCR at every lab bench.

- **Compact design**—fits in everyone's lab space at just 7.5 in. (19 cm) wide
- **Cloud-enabled**—conveniently access your instrument anytime, anywhere with the Connect Platform
- **Fleet control-compatible**—manage multiple instruments, users, and methods with Thermal Cycler Fleet Control Software

Secure remote access with cloud-enabled instruments

The ProFlex, VeritiPro, SimpliAmp, and MiniAmp Thermal Cyclers are cloud-enabled instruments, allowing you secure, private access with an account on the Connect Platform. Anywhere, anytime with any mobile device or desktop computer you can:

- Design and share protocols
- Schedule an instrument
- Start or stop a run
- Check run status

Find out more at thermofisher.com/miniamp

Did you know?

Most Applied Biosystems thermal cyclers come with a two-year standard warranty and a starter kit that includes Applied Biosystems PCR plate and tube samples and all the tools you need. Packages that include the instrument, an extended warranty, and consumables are available. Visit the instrument webpage to view available packages.

Designed for easy robotic integration

Automated Thermal Cycler

The Applied Biosystems™ Automated Thermal Cycler offers the flexibility, reliability, and performance needed in a complete PCR automation system. The small, easy-to-integrate format of the Automated Thermal Cycler enables hands-free PCR results.

- **Flexible modular design and small footprint**—helps save space on deck
- **Automated lid**—easy, hands-free operation with a liquid handler or plate stacker
- **Free desktop software**—for PCR optimization prior to robotic integration
- **Plug-and-play drivers and Standardization in Lab Automation (SiLA) compatibility**—for easy integration on your liquid handler of choice
- **Fleet control-compatible**—manage multiple instruments, users, and methods with Thermal Cycler Fleet Control Software

Designed for any stage of your workflow automation journey

Stand-alone

Optimize assays before robotic integration with our direct software.

Plug-and-play drivers

Ask about available drivers for leading robotic platforms.

SiLA-compatible

Maximum robotic platform integration flexibility with SiLA rapid integration coding.

Manage multiple users, methods, and instruments with a single intuitive interface

Thermal Cycler Fleet Control Software

Applied Biosystems™ Thermal Cycler Fleet Control Software is as intuitive and easy to use as our thermal cyclers are. With this tool, you'll be able to view and control all Applied Biosystems™ thermal cyclers in your facility.

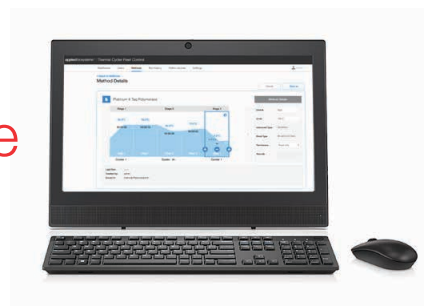

Secure—comes preinstalled on a server that sits securely behind your firewall

Flexible—create custom permissions and rules for users, methods, and instruments

Powerful—quickly view your thermal cycler inventory and availability right from the dashboard

Efficient—track system changes with an audit log, and identify methods or instruments via barcode data entry

Convenient—control your thermal cyclers, reports, methods, and firmware upgrades from your office, another lab computer, or any other networked device

Find out more at thermofisher.com/fleetcontrol

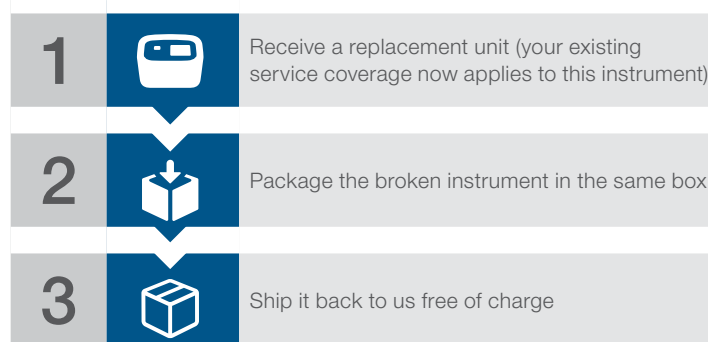

Science can't wait on instrument downtime

Thermal cycler services and support

You can't afford downtime in your lab. Built on more than 35 years of service expertise, our superior service solutions for Applied Biosystems™ instruments and applications help keep your lab up and running. More than 1,400 trained professionals make up the industry's largest network, ready to assist you when you need it.

Rapid Exchange

When fast turnaround time is critical and asset tag consistency is not required, choose our Rapid Exchange plan. If our Remote Service Center engineers can't repair your instrument through telephone support, we will ship you a factory-certified refurbished replacement instrument within one business day—and it's yours to keep.

AB Repair Center (ABRC) Support Plus

Our AB Repair Center plan is the best choice for customers in regulated environments that must maintain asset tag consistency to comply with regulated protocols and need their instrument returned after repair. With this mail-in

Off-site service plans at a glance

	Rapid Exchange	AB Repair Center (ABRC) Support Plus
Plan designed for	Labs that operate under critical timelines	Regulated labs that must maintain asset tag consistency to comply with regulated protocols

* Subject to regional availability.

** Your instrument repaired and returned in ~3 weeks. Service plan without loaner instrument also available.

option, we provide a loaner instrument for you to use while factory-trained engineers maintain and repair your instrument at our Remote Service Center. All instruments undergo certification performance tests, temperature verification, instrument and optical calibration, ground continuity, and firmware upgrades, when applicable.

Just mail us your instrument and we'll repair and ship it back to you within three weeks. All parts, labor, and shipping charges are included. Planned maintenance, temperature verification, and loaner instrument service* can be added to any off-site service plans.

Check your instrument's coverage status at thermofisher.com/manage

Digital service innovations

Our instrument service plans include digital innovations that help keep your instruments and your lab running smoothly. With pioneering on-demand tools and capabilities such as remote support using mobile augmented-reality (AR) technology, instrument-driven support, and on-demand instrument training, we're constantly looking ahead so your lab never falls behind.

Explore our digital service innovations at thermofisher.com/innovations

Temperature verification services

Multiplex dynamic temperature verification (MDTV) and multiplex dynamic temperature measurement (MDTM) services are designed to deliver fast, accurate temperature readings and documentation to assess the accuracy and uniformity of your PCR systems. MDTV is available for Applied Biosystems thermal cyclers; MDTM is available for most thermal cyclers from other manufacturers.**

Watch the "Five reasons to verify your thermal cycler's accuracy" video at thermofisher.com/mdtv

Download a sample of an MDTV report at thermofisher.com/mdtvreport

Education services

It can be difficult to prepare yourself for what's next while you're focused on the work you have now. Our interactive professional training courses make it easier. We offer a combination of virtual and in-person classroom instruction, and hands-on learning in your lab to match your schedule, budget, and learning preferences. Whichever course style you choose, you'll learn from one of our 300 highly skilled application scientists who are available to lead sessions online, at your location, or at one of our 12 training centers located worldwide.

Explore courses at thermofisher.com/educationservices

Technical support

If you have questions about product selection or use, assay or experimental design, data analysis, or troubleshooting, contact our team of technical support scientists or access our online product and application support tools.

High-performance PCR plastics for optimal PCR results

Engineer Approved MicroAmp PCR plastics

Applied Biosystems™ PCR plastics have been designed and validated to work with our thermal cyclers for more than 25 years. That's why they are Engineer Approved to enable optimal PCR performance.

Applied Biosystems™ MicroAmp™ PCR plastics are:

- Validated on Applied Biosystems thermal cyclers for optimal fit and performance
- Designed for optimal heat transfer with thin-walled polypropylene wells
- Designed to reduce cross-contamination with raised well rims for effective sealing

Applied Biosystems™ MicroAmp™ TriFlex 3 x 32-Well PCR Reaction Plate and adhesive film

- One plate that can be used as separated, individual 32-well plates or as a full 96-well plate
- Easy-to-tear dual side tabs
- Alphanumeric labeling on each plate segment
- Precut Applied Biosystems™ MicroAmp™ 32-Well Clear Adhesive Film

Unique, high-performance features of Applied Biosystems™ MicroAmp™ EnduraPlate™ plastic consumables

Easy visual organization

5 color choices

Easy-to-read well identification text

Black text for excellent contrast

No warping, even after thermal cycling

Polycarbonate (hard shell) for mechanical stability and flatness

Snug fit to thermal blocks

Thin-wall polypropylene for excellent mechanical fit and heat transfer

Available in common formats

96-well standard, 96-well Fast, 384-well, 5-piece sample packs, 20 & 500 packs

Constructed to ANSI/SBS standard

Certified DNA-, RNase-, and PCR inhibitor-free

Compatible with and optimized for performance on Applied Biosystems instruments

Options for every format and throughput need

Choose from tubes, tube strips, plates, adhesive film, and accessories for any throughput need. MicroAmp EnduraPlate plastics offer a solution for experiments that require special handling, such as automated or high-throughput workflows, and an even greater degree of durability for use with multi-instrument experiments.

MicroAmp 8-tube strips with attached optical flat caps are also available for qPCR.

The Applied Biosystems™ MicroAmp™ 8-Tube Strip with attached optical or domed caps offers a combination of features to help prevent cross-contamination, pipetting errors, and sample identification errors in your PCR and real-time PCR applications.

- Attached caps that open and close independently of each other
- Etched A–H letter labeling for individual tubes and caps
- Dual side tabs for strip labeling
- Graduated 20 μ L measuring markers on every tube
- Available exclusively for Applied Biosystems™ thermal cyclers to enable optimal PCR results

Did you know?

Proper plate sealing helps reduce evaporation and well-to-well contamination.

1. Remove the backing of the Applied Biosystems™ adhesive film.

2. Align the adhesive film so as to cover all wells while placing on the plate.

3. Rub the flat edge of the applicator along the long edge (length) of the plate, then along the short edge (width). Finally, rub the applicator between all the wells and around the outside edges of the plate using small back-and-forth motions to form a complete seal.

Which PCR plastic fits your needs?

Superior cDNA synthesis for any application

SuperScript IV Reverse Transcriptase

With over 50,000 citations, reviews, and publications, Invitrogen™ SuperScript™ reverse transcriptases are among the most trusted and widely used products for cDNA synthesis. Invitrogen™ SuperScript™ IV Reverse Transcriptase is the latest enzyme in the portfolio, engineered to deliver superior cDNA synthesis performance with even the most challenging RNA samples.

- **Super-efficient**—up to 100x higher cDNA yields than with other reverse transcriptase enzymes
- **Super-sensitive**—transcribes even from degraded or inhibitor-containing RNA, with low input amounts
- **Super-robust**—high thermostability and processivity for superior cDNA synthesis
- **Super-fast**—10 min cDNA synthesis protocol

Find out more at thermofisher.com/ssiv

Reverse transcription reagent selection guide

We offer a comprehensive portfolio of enzymes and kits within the SuperScript IV family to suit your research needs. Start with the selection guide below to find the best format for common cDNA synthesis applications.

Would you like to have the ability to optimize reaction components and conditions?	... a complete kit with all cDNA synthesis reaction components?	... ultimate convenience and minimal pipetting steps for RT-PCR?	... the ability to skip the RNA extraction process and synthesize cDNA directly from mammalian cell lysate?
Product format	Stand-alone enzyme	First-strand cDNA synthesis kit	One-Step RT-PCR kit	Direct RT kit
Recommended product	SuperScript IV Reverse Transcriptase	SuperScript IV First-Strand Synthesis System	SuperScript IV One-Step RT-PCR System	SuperScript IV CellsDirect cDNA Synthesis Kit
Applications	RT-PCR, RT-qPCR, sequence detection, gene expression analysis, transcript variant detection, cloning, cDNA library construction, RACE, RNA-Seq	RT-PCR, RT-qPCR, sequence detection, gene expression analysis, transcript variant detection, cloning, cDNA library construction, RACE, RNA-Seq	RT-PCR, sequence detection, cloning, genotyping, high-throughput analysis	RT-PCR, RT-qPCR
Input total RNA	1 pg–5 µg	1 pg–5 µg	0.01 pg–1 µg	1–10,000 cells
Optimal reaction temperature	50–55°C	50–55°C	50–55°C	50–55°C
Reaction time	10 min	10 min	10 min	10 min
cDNA synthesis with challenging or degraded RNA	Yes	Yes	Yes	Yes

Order Invitrogen™ oligo(dT) or random primers for cDNA synthesis at thermofisher.com/rtpimers

Complete kit with flexible priming options

SuperScript IV First-Strand Synthesis System

The Invitrogen™ SuperScript™ IV First-Strand Synthesis System is optimized for synthesis of first-strand cDNA from purified poly(A)⁺ or total RNA. The kit contains all components needed for reverse transcription, plus an additional control gene and primers, providing the flexibility to customize the reaction setup to fit the needs of your application.

Find out more at thermofisher.com/ssiv-firststrand

Want to do direct reverse transcription?

Invitrogen™ SuperScript™ IV CellsDirect™ cDNA Synthesis Kit allows you to synthesize cDNA directly from mammalian cells without the need for RNA extraction. Learn more when you flip the brochure to the real-time PCR side, or visit thermofisher.com/cellsdirect

Enabling faster, more efficient RT-PCR

SuperScript IV One-Step RT-PCR System

Even with challenging RNA samples, you can get more efficient results faster and easier than with any other RT-PCR reagent. The Invitrogen™ SuperScript™ IV One-Step RT-PCR System combines high-processivity SuperScript IV Reverse Transcriptase and high-fidelity Invitrogen™ Platinum™ SuperFi™ DNA Polymerase to provide superior one-step RT-PCR performance.

Find out more at

thermofisher.com/ssiv-onestep

- **Two-phase hot-start activation mechanism**—for high specificity, improved yields, and easy room temperature setup
- **Superior sensitivity and speed**—down to 0.01 pg of RNA, target length up to 13.8 kb, and the fastest one-step RT-PCR protocol
- **Reliable target detection**—even in RNA samples with suboptimal purity
- **Fast and easy gDNA removal**—for superior accuracy and confidence in your results

Doing RT-qPCR?

Invitrogen™ SuperScript™ IV VILO™ Master Mix offers exceptional cDNA synthesis for RT-qPCR applications, while maintaining superior linearity across the broadest range of input RNA. Learn more when you flip the brochure to the real-time PCR side, or visit thermofisher.com/4vilo

Did you know?

Assembled PCR reactions with Platinum SuperFi II or Platinum II *Taq* Hot-Start DNA Polymerase are stable for 24 hours at room temperature, enabling high-throughput applications with automation or long waits between runs.

Ultimate accuracy and robustness

Platinum SuperFi II DNA Polymerase

Invitrogen™ Platinum™ SuperFi™ II DNA Polymerase is a hot-start, engineered proofreading DNA polymerase for PCR applications requiring the highest sequence accuracy. Its fidelity is >300x that of *Taq* DNA polymerase and its buffer is specially formulated for a universal annealing temperature of 60°C.

- **Exceptional fidelity**—>300x more accurate than *Taq* DNA polymerase
- **Simplified workflow**—no need for primer melting temperature (T_m) calculation; enables co-cycling of multiple PCR targets
- **Increased PCR success**—robust amplification of GC-rich targets, DNA of suboptimal purity, and long sequences

- **Platinum hot-start technology**—enables superior specificity, sensitivity, and yields; allows for room temperature reaction setup and benchtop stability

Find out more at thermofisher.com/platinumsuperfi

Enhanced PCR specificity and yield with fast cycling

Platinum II *Taq* Hot-Start DNA Polymerase

Invitrogen™ Platinum™ II *Taq* Hot-Start DNA Polymerase is an enzyme engineered for simplicity, specificity, and speed. Its universal primer annealing feature simplifies optimization and allows co-cycling of different PCR assays.

- **Universal primer annealing at 60°C**—reduces tedious optimization steps and enables co-cycling of different PCR assays

- **Engineered *Taq* DNA polymerase**—allows 4x faster synthesis and successful amplification even in the presence of inhibitors
- **Platinum hot-start technology**—enables superior specificity, sensitivity, and yields; allows for room temperature reaction setup and benchtop stability

Nucleic acid separation and analysis

Simplify nucleic acid electrophoresis

E-Gel precast agarose gels

Using precast agarose gels can simplify the nucleic acid electrophoresis workflow. Invitrogen™ E-Gel™ precast gels are self-contained and ready for use, with the agarose and the DNA stain packaged in a disposable cassette. There are no gels to pour, buffers to make, staining or destaining steps to perform, or gel boxes to assemble. Just load your samples and start the run.

- **Ready to use**—precast with agarose and DNA stain packaged inside a disposable cassette
- **Time-saving**—ideal for customers looking to streamline workflows

- **Versatile**—designed for rapid analysis of PCR products, restriction digests, and plasmid preparations
- **Genotyping**—ideal for rapid analysis of PCR products and restriction digests to improve genotyping workflows

Sample analysis in three simple steps—load, run, and analyze.

E-Gel precast gels are available in a variety of formats for routine and high-throughput applications, with different stains and agarose percentages (0.8%, 1.2%, 2%, and 4%). To find the right gel for your needs, see the selection guide at thermofisher.com/egclselection

Fully integrated DNA electrophoresis and imaging platform

E-Gel Power Snap Electrophoresis System

The Invitrogen™ E-Gel™ Power Snap Electrophoresis System combines rapid, real-time nucleic acid analysis with high-resolution image capture for superior convenience. The integrated design helps reduce workflow time and accelerate discovery.

Features of the E-Gel Power Snap Electrophoresis System:

- **Faster analysis**—go from sample loading to image capture in as little as 15 minutes
- **Simple operation**—intuitive user interface with large touchscreen and integrated operating system
- **Safer workflow**—minimize handling of hazardous chemicals when used with E-Gel precast gel cassettes

E-Gel precast gels

E-Gel precast gels are available in a variety of formats: from low to high throughput, with SYBR Safe stain, and with agarose percentages suitable for either general-purpose or high-resolution separations.

Need high-throughput analysis?

Accelerate high-throughput electrophoresis analysis with Invitrogen™ E-Gel™ 48 and E-Gel™ 96 Agarose Gels with SYBR Safe DNA Gel Stain run on our expandable Invitrogen™ E-Base™ Electrophoresis System.

Starter kits

Invitrogen™ E-Gel™ Power Snap System Starter Kits include all the components you need to start performing nucleic acid separation, analysis, and collection in minutes, not hours.

Specifications

Invitrogen™ E-Gel™ Power Snap Electrophoresis Device	
Dimensions	24 x 13 x 7 cm
Weight	1 kg
Touch-screen LCD display	7.7 x 4.4 cm
LED light	Blue LED; center wavelength: 465 nm; full width, half max.: 20 nm
Viewing surface dimensions	9 x 11 cm
Amber filter dimensions	8.6 x 10.5 cm
LED life	50,000 hours
LED specification	Array of 12 high-power LEDs with emission wavelength at 465 ± 10 nm

Invitrogen™ E-Gel™ Power Snap Camera	
Dimensions	26 x 13 x 15 cm
Weight	1 kg
Touchscreen LCD display	11.5 x 8.6 cm
Camera type	Color, complementary metal-oxide semiconductor (CMOS)
Gel-image resolution	1,600 x 1,944 (3 MP), 8 bits
Dynamic range	68 dB
Image output	TIF (grayscale) and JPG (color) file formats
Lens f-number	2.8
Internal memory	32 GB

E-Gel precast agarose gel compatibility and protocol run time

The E-Gel Power Snap Electrophoresis Device is compatible with the following E-Gel precast agarose gels and contains preloaded default run time protocols.

Did you know?

Samples can be run up to twice as fast with E-Gel precast gels compared to conventional handcast gels. E-Gel precast gels are available in a variety of agarose concentrations, well formats, and throughput capacities to suit any application need.

Pour your own agarose gels

Stains and reagents for electrophoresis

Pour-your-own electrophoresis reagents

Choosing the right tools for nucleic acid electrophoresis can significantly improve and accelerate results, enabling you to address downstream applications sooner.

DNA stains

Detection of nucleic acid samples in gels can be improved using fluorescent dyes that are safer and/or more sensitive than ethidium bromide. The Invitrogen™ SYBR™ Safe, SYBR™ Green I, and SYBR™ Gold stains provide greater safety and/or sensitivity with lower background fluorescence than the conventional ethidium bromide stain.

Find out more at thermofisher.com/stains

UltraPure reagents for electrophoresis

Invitrogen™ UltraPure™ reagents are specifically formulated to meet your nucleic acid analysis and purification needs. UltraPure agarose and reagents are made from highly pure biochemicals for maximum reliability and superior performance.

PCR primers and dNTPs

Primers

We offer high-quality Invitrogen™ custom DNA oligos for successful PCR. Our oligos feature over 24 years of customer service and popular primer design tools, as well as an informative, easy-to-use ordering portal to meet your needs.

Invitrogen custom DNA oligos offer:

- Purity that you require: desalted, cartridge, HPLC, or PAGE
- Scales that suit your research needs: 25 nmol, 50 nmol, 200 nmol, 1 µmol, and 10 µmol
- Product format you prefer: tube or plate
- Affordable price
- Quick next-day delivery*

Find out more at thermofisher.com/primers

The free Invitrogen™ OligoPerfect™ Primer Designer enables you to:

- **Gain confidence**—Primer3-based design algorithm
- **Speed up**—design primers for PCR or CE, up to 50 genes at the same time
- **Work smarter**—recognizes .txt and .fasta file types
- **Order with ease**—seamlessly integrates with the Invitrogen™ ordering portal
- **Store your data**—ability to save your projects

Try OligoPerfect Primer Designer at thermofisher.com/oligoperfect-designer

* Next-day delivery available, depending on region and country.

dNTPs

Our dNTPs have been extensively tested and verified for use in a wide variety of molecular biology applications, including highly sensitive techniques such as RT-qPCR and next-generation sequencing.

Learn more at thermofisher.com/dntp

Specialty enzymes for molecular diagnostics development and commercial supply

Whether you need flexibility in assay design or custom functional testing, we can help accelerate your nucleic acid-based assay development with our innovative DNA-free and lyo-ready enzymes.

DNA-free PCR enzymes*

We've pioneered the use of single-use systems (SUS) to manufacture DNA-free PCR enzymes. The advantages include:

- Manufactured in a completely closed system using dedicated or single-use equipment
- Verified free of contaminating DNA from host, human operator, and environment
- Produced in an ISO 13485–certified facility for high standards of quality

* Platinum *Taq* DNA Polymerase, DNA-free, is available as a catalog product.

Learn more at thermofisher.com/dna-free

Lyo-ready DNA polymerases and reverse transcriptases

From Platinum *Taq* DNA polymerases to SuperScript reverse transcriptases, we offer the largest selection of lyophilization-compatible enzymes, providing:

- The same functional enzyme performance as with the conventional format
- Tailor-made solutions for your specific applications, including custom formulation
- Higher confidence in results with low residual DNA contamination (human and bacterial)

Real-time PCR solutions

More efficiency to take your
research further

ThermoFisher
SCIENTIFIC

Discover more efficient real-time PCR (qPCR)

The family of most-cited Applied Biosystems™ qPCR solutions delivers the caliber of results you need, faster and easier than you could have imagined. Free yourself from extra steps, preventable rework, and other inefficiencies so you can focus on making meaningful discoveries.

Experience the difference that the efficient workflow of Applied Biosystems qPCR solutions can make to your research success:

- Connected instruments incorporate smart technologies to enable hands-free operation and remote support, while a suite of cloud-based analysis software provides greater flexibility.
- Predesigned Applied Biosystems™ TaqMan® Assays provide everything you need, including TaqMan® probe and PCR primer sets formulated to work right out of the box. No additional design, optimization, or post-run analysis steps are required.
- Complement your assay with an Applied Biosystems™ TaqMan® master mix and experience the gold standard in qPCR performance. We also offer Applied Biosystems™ SYBR™ dye chemistry with advanced features like dye tracking that help prevent pipetting errors.

More time. More flexibility. More efficiency.

Experience more from your qPCR.

Real-time PCR applications

Real-time PCR is used for sensitive, specific detection and quantification of nucleic acid targets. We have developed powerful assay design algorithms, optimized master mixes, intuitive data analysis software, and flexible instrumentation to help harness the power of qPCR across a rich and diverse set of applications. Explore our robust solutions for your qPCR-based research.

Infectious disease research

See our growing catalog of sensitive, specific real-time PCR probe and primer sets to study microbe biology and pathogenicity, host response, and disease pathology.

Food pathogen detection

Detect multiple bacteria in the same run, including *Salmonella*, *Campylobacter*, *E. coli* O157:H7, *Listeria monocytogenes*.

Waterborne pathogen detection

Designed to detect and monitor waterborne pathogens in recreational and drinking water supplies.

Pharmaceutical analytics

Designed to detect mycoplasmas, viruses, and residual host cell contamination for pharmaceutical, cosmetics, and personal care product manufacturing.

Qualified solutions

A growing menu of new and valuable content for you to use on your high-throughput real-time PCR systems, including pharmacogenomics, vaginal microbiota, and *CFTR* mutation analysis.

Stem cell research

Solutions for analyzing stem cells, determining stemness, and studying gene regulation and translation in stem cells.

Pharmacogenomics research

Predesigned Applied Biosystems™ TaqMan® Assays for more than 175 ADME and CYP targets, including >95% of ADME core markers and a warfarin metabolism panel.

Oncology and genetic disease research

Enabling robust, reliable detection and quantitation of markers for cancer and genetic diseases.

Plant sciences and agricultural biotechnology

Instruments, reagents, and kits designed for plant researchers that enable remarkable agricultural discoveries—from improved crops that feed more people to sustainable biofuels.

Other key applications include gene expression, genotyping, and sequencing.

Real-time PCR software

A suite of analysis modules for the QuantStudio instrument family is available on the Thermo Fisher™ Connect Platform, enabling users to access and analyze their data anytime and anywhere. Just create and sign in to your account to use the Connect Platform for secure, cloud-based data storage, scientific analysis apps, and peer collaboration tools. Use the asset management apps and web tools to schedule time on your lab's instruments via your mobile device.

thermofisher.com/connect

Applied Biosystems qPCR analysis modules are a set of modules that provide an online toolkit for the analysis of qPCR data. The software takes advantage of the Connect Platform to provide highly versatile analysis tools that are flexible, fast, and easy to use and facilitate functional understanding of qPCR and related data. These modules allow users to combine over 100 genotyping, expression, or qPCR experiments into a project and analyze the data within minutes. Featured modules include:

- Design and Analysis
- High Resolution Melt (HRM) Analysis
- Presence/Absence Analysis
- Standard Curve
- Genotyping
- hPSC Scorecard Analysis
- Relative Quantification

Design and Analysis

The Design and Analysis app offers the ability to create, edit, and analyze qPCR instrument files.

High Resolution Melt (HRM) Analysis

This High Resolution Melt Analysis (HRM) app is designed for post-PCR analysis to identify variation in nucleic acid sequences. The method is based on detecting small differences in PCR melting (dissociation) curves. It is enabled by high-brightness, dsDNA-binding dyes used in conjunction with real-time PCR instrumentation that has precise temperature ramp control, advanced data capture capabilities, and access to software designed specifically for HRM analysis.

Presence/Absence Analysis

The Presence/Absence Analysis app analyzes and interprets real-time PCR data or post-read data to determine if a specific target sequence is present in a sample or not. It provides an easy-to-view presence/absence result in a plate grid view.

Standard Curve

The Standard Curve app offers reliable quantification of unknown quantities of genes and enables importing of standard curves from other experiments, providing analysis flexibility.

Genotyping

The Genotyping app includes improved visuals and integrated traces of allelic discrimination plots to allow thorough QC of SNP assays to accurately reflect the true signals versus background noise.

hPSC Scorecard Analysis

The hPSC Scorecard Analysis app scores gene expression profiles generated using the TaqMan hPSC Scorecard Panel compared to a reference set of well-characterized pluripotent stem cell lines. It provides raw data as well as box plots, heat maps, and correlation plots for export.

Relative Quantification

The Relative Quantification app allows fast and powerful gene expression analysis with enhanced visual capabilities for relative quantification, including integrated correlation and volcano and cluster analysis with the ability to drill down to amplification plots.

Intuitive and easy to use for all levels of experience

QuantStudio 1, 3, and 5 Real-Time PCR Systems

The Applied Biosystems™ QuantStudio™ 1, QuantStudio™ 3, and QuantStudio™ 5 Real-Time PCR Systems provide advancements in touchscreen usability, allowing you to stay connected to your data easily. They're designed for both new and experienced users who need simple and affordable instruments without compromising performance or quality.

Get a premium instrument at an affordable price

Access, analyze, and share data anytime, anywhere with the Connect Platform—cloud-enabled services that support remote monitoring of your runs in real time, analyze sophisticated datasets in minutes, securely store data, and share results online with colleagues across institutions and around the world

Obtain results you can trust—detect differences in target quantity as small as 1.5-fold in singleplex reactions, and obtain 10 logarithmic units of linear dynamic range

Multiplex with ease—up to six excitation and six emission filters offer 21 different color combinations, allowing a broad range of detection chemistries and maximum multiplexing

Helps save valuable time—QuantStudio 3 and 5 systems offer 3 or 6 independent temperature zones for flexibility to run multiple experiments simultaneously. Fast thermal cycling enables results in less than 30 minutes

Get up and running quickly—instrument is factory-calibrated for accuracy, quick installation, and immediate use. Preoptimized protocol templates help minimize training for new users, and the included SmartStart Orientation provides basic qPCR training and setup for both the Connect Platform and the Instrument Management tool

Maximize benchtop space—compact instrument can be configured as a stand-alone or with a computer

 = cloud-enabled instrument

Smarter productivity and improved workflow

QuantStudio 6 Pro and 7 Pro Real-Time PCR Systems

The Applied Biosystems™ QuantStudio™ 6 Pro and 7 Pro Real-Time PCR Systems are designed to save space on the lab bench, increase format flexibility, and support quick and simple block changes. These systems also deliver a smart workflow experience with advanced features that are designed for efficiency and productivity.

Personalized

- Automatically load your settings and plate setup
- Simply log in with facial authentication, no passwords required
- SmartStart Orientation, which includes one day of on-site training that covers basic instrument operation and maintenance, and a choice of hands-on application training (including reagents) on either absolute quantification, gene expression, or genotyping

Efficient

- Minimize hands-on time with voice commands facilitating hands-free operations
- Eliminate manual steps to obtain plate layout, protocol, and assay information on the instrument when using Applied Biosystems™ TaqMan® Array Plates with RFID (see page 14 for more information)
- Maximize uptime with the push-button Smart Help feature to access technical support scientists for faster, more efficient troubleshooting and resolution
- Reduce downtime using the Smart Remote Support collaboration tool with real-time video/audio and desktop support to guide you through repairs remotely

Simple

- Streamlined workflow directly from touchscreen
- Simple, tool-free block changes

Productive

- Access data anytime and anywhere with cloud-enabled services from the Connect Platform
- Built-in help videos for commonly used activities
- Increased ergonomics due to larger touchscreen, improved screen angle, and optional Bluetooth™ keyboard

The QuantStudio 7 Pro system also features automation compatibility and a security, auditing, and e-signature (SAE) package.

* Automation is available for the QuantStudio 7 Pro system and is available for the QuantStudio 6 Pro system after upgrade.

Maximum productivity with minimum effort

QuantStudio 12K Flex Real-Time PCR System

This one instrument enables multiple users to conduct a wide range of experiments, from low- to high-throughput sample processing and virtually any PCR application, such as:

- Drug discovery
- Pharmacogenomics research
- MicroRNA profiling
- Agriculture molecular testing
- *CFTR* mutation analysis
- Vaginal microbiota research

Miniaturization at a lower cost

Applied Biosystems™ OpenArray™ technology is a broadly applicable nanoliter fluidics platform for low-volume solution-phase reactions, and enables lower reagent and assay costs, and rapid parallel processing.

Superior throughput

The Applied Biosystems™ QuantStudio™ 12K Flex Real-Time PCR System can simultaneously run up to four 3,072-reaction Applied Biosystems™ OpenArray™ plates in about 4 hours. You can produce up to 110,000 data points in an 8-hour day with the addition of a single Applied Biosystems™ ProFlex™ PCR System.

Outstanding flexibility

Easily switch between five available thermal cycling blocks: OpenArray plate, TaqMan Array Card, 384-well, and standard or Fast 96-well blocks. Load the thermal cycling block in less than 1 minute—no tools required.

Increased data integrity and quality control—with results you can trust

The integrated sample tracking and security, auditing, and electronic signature (SAE) module assist you in supporting 21 CFR Part 11 compliance.

Application spotlight

Pharmacogenomics research

Pharmacogenomics is the study of drug efficacy based on a subject's unique genomic composition. The QuantStudio 12K Flex system and OpenArray technology provide a simple, cost-effective, and fast workflow for the analysis of mutations and copy number variants associated with drug metabolism enzyme (DME) genes.

OpenArray workflow

One simple step gets you to your data faster

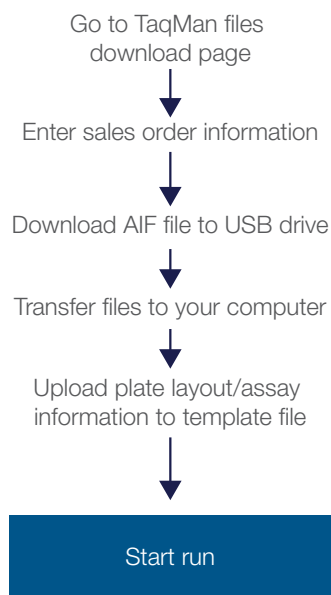

TaqMan Array Plates with RFID

TaqMan Array Plates with RFID and QuantStudio 6 and 7 Pro systems create an improved user experience with smart features that eliminate the manual steps currently necessary to set up the plate file for your real-time PCR instrument run. Just insert the RFID plate, and the QuantStudio Pro system captures the plate setup information, including:

- Plate layout—assay IDs in each well
- Plate type
- Expiration date
- Cat. No.
- Lot. No.
- Reaction volume per well
- Passive reference dye
- Thermal protocol

Conventional workflow

The perfect solution to automate a variety of workflows

Orbitor RS2 Microplate Mover

The easy-to-use, flexible, and reliable Thermo Scientific™ Orbitor™ RS2 Microplate Mover is a collaborative benchtop mover that provides superior reliability and improved process efficiency. Its innovative bidirectional telescoping arm, coupled with its expansive 360° workspace, provides exceptional reach and precision, making the Orbitor RS2 Microplate Mover your trusted laboratory productivity partner.

Designed with you in mind

- Integrated barcode reader enables sample tracking, barcode transmission, and inventory management
- Plate detection in the gripper helps to eliminate labware handling errors and reduces the risk of lost samples
- Variable force settings make it compatible with many plate types for a variety of applications

Specifications

General specifications		Axis/joint specifications			
Power requirements	110–230 V, automatic switching	Axis	Range	Velocity	Acceleration
Operating environment	4–40°C, noncondensing	Z (height)	575 mm	750 mm/sec	2,250 mm/sec ²
Safety compliances	CE, CSA	Radius (reach)	±406 mm	200 mm/sec	3,600 mm/sec ²
Weight	25 kg	Theta (rotation)	Infinite	225 deg/sec	675 deg/sec ²
Motion control	Closed-loop servo, brushless AC motor	Gripper stroke	51 mm		
Control	Directly from PC, requires Windows 7 or 10 operating system				
Storage options					
Random access hotel	8 plates per hotel, maximum capacity of 24 plates, best for 384-well				
Sequential access stack	40 plates per stack, maximum capacity of 80 plates, best for 384-well and 96-well (0.2 mL and 0.1 mL) plates

Absolutely attainable chip-based digital PCR

QuantStudio 3D Digital PCR System

The Applied Biosystems™ QuantStudio™ 3D Digital PCR System leverages high-density nanofluidic chip technology for detecting rare events, analyzing small differences between two targets, or counting the exact number of targets in a sample. The higher precision, sensitivity, and absolute nature of digital PCR is ideal for research in:

- Qualification of molecular standards used in traditional real-time PCR experiments
- Pathogen detection and load determination
- Rare-target detection such as somatic mutation detection in oncology research
- GMO detection and contamination assessment
- Generation of references and standards
- Copy number variation

Simple workflow

A streamlined workflow with minimal sample handling enables turnkey processing. Just load and go.

Affordable

Less than half the price of competing platforms, making digital PCR technology within reach for most labs.

Absolute quantification

20,000 reaction wells yield data in copies/ μ L, enabling high precision and sensitivity without the need for a standard curve.

Sealed system

Helps limit contaminants with a sealed chip and no exposed sample transfer steps.

Easily fits in populated spaces

Small footprint (17.8 x 12.7 x 22.9 cm, 7 x 5 x 9 in.) will fit most benchtops and can be moved when needed.

Compatible

Use your existing Applied Biosystems™ TaqMan® Real-Time PCR Assays for a digital result.

Application spotlight

Determining low copy number in equivocal tissue

Many cancers are regulated by mutations in a specific gene or group of genes, or by copy number changes. These aberrations may be associated with aggressiveness of the disease or prognosis. Research using digital PCR provides a fast and easy workflow to precisely identify low copy numbers that have small differences. Compared to immunohistochemistry by fluorescence *in situ* hybridization, digital PCR is less impacted by tissue heterogeneity and provides clearer research results.

Specifications

QuantStudio 3D Digital PCR Instrument	
Time to read 1 sample	~30 sec
PCR detection method	Endpoint
Sample illumination	LED
Sample detection	CMOS
Detection channels	FAM/SYBR Green, VIC, ROX
Reader size (H x W x D)	21 x 13.5 x 23.3 cm
Weight	2.4 kg
QuantStudio 3D Digital PCR 20K Chip	
Partitions	Chip reaction wells
Samples per chip	1
Targets per chip	2
Chip capacity in thermal cycler	24
Reaction wells per sample	20,000
Loading volume	14.5 µL
Sealed workflow	Yes
Performance	
Dynamic range	5 logarithmic units
Precision at 95% confidence interval	±10%
Compatible chemistries	TaqMan and SYBR Green chemistries

Accelerate scientific advancement with a direct line to superior services and support

Keep your QuantStudio Real-Time PCR Systems up and running
with superior services and support

Service plans help protect your investment

All new instruments are protected by a standard factory warranty. This warranty covers all costs for travel, labor, and parts for repairs. Extended coverage service plans are also available at the time of instrument purchase. Services at additional charge include:

- Service plans with guaranteed response times*
- Priority technical support—priority phone access to our trained and certified technical and instrument support specialists
- 24-hour response time—expedited access to remote service engineers within 24 hours

Check your instrument's coverage status at
thermofisher.com/manage

Digital service innovations

Our instrument service plans include digital innovations that help keep your instruments and your lab running smoothly. With pioneering on-demand tools and capabilities such as remote support using mobile augmented-reality (AR) technology, instrument-driven support, and on-demand instrument training, we're constantly looking ahead so your lab never falls behind.

Explore our digital service innovations
at thermofisher.com/innovations

Instrument hardware qualification (IQ/OQ/PQ)

Our manufacturer-trained and certified field service engineers will conduct and document comprehensive tests, including software and hardware compatibility matrixing, component verification, and site requirements, to verify performance and provide reliable, audit-style documentation to meet your regulatory requirements. Installation qualification (IQ), operational qualification (OQ), and performance qualification (PQ) or instrument performance verification (IPV) services are recommended at installation, after moving the instrument, after software or hardware upgrades, and after planned maintenance or critical repairs.

Contact an instrument qualifications specialist at
thermofisher.com/iqoqpq

Analytical validation consulting services

Why handle your analytical validation (AV) in-house, when using our AV consulting services can speed up the launch process by up to 75% and cut costs by up to half? We'll consult with you to develop and optimize your validation workflow, while providing data analysis support and template documentation to fully maximize your instrument and reagent investment.

Get a complete list of assays and panels we support,
or contact an AV consulting services specialist at
thermofisher.com/av

Education services

It can be difficult to prepare yourself for what's next while you're focused on the work you have now. Our professional, interactive training courses make it easier.

We offer a combination of virtual and in-person classroom instruction, and hands-on learning in your lab to match your schedule, budget, and learning preferences. Whichever course style you choose, you'll learn from one of our 300 highly skilled application scientists who are available to lead sessions online, at your location, or at one of our 12 training centers located worldwide.

Explore courses at [thermofisher.com/educationservices](https://www.thermofisher.com/educationservices)

Technical support

If you have questions about product selection or use, assay or experimental design, data analysis, or troubleshooting, contact our team of technical support scientists or access our online product and application support tools.

How to reach us

High-performance real-time PCR plastics for optimal qPCR results

Engineer Approved MicroAmp qPCR plastics

Applied Biosystems™ PCR plastics have been designed and validated to work with our thermal cyclers for more than 25 years. That's why they are Engineer Approved to enable optimal PCR performance.

Applied Biosystems™ MicroAmp™ qPCR plastics are:

- Validated on Applied Biosystems thermal cyclers for optimal fit and performance
- Designed to perform on all Applied Biosystems qPCR instruments
- Designed for optimal heat transfer with thin-walled polypropylene wells
- Designed to reduce cross-contamination with raised well rims for effective sealing

Unique, high-performance features of Applied Biosystems™ MicroAmp™ EnduraPlate™ plastic consumables

Easy visual organization

5 color choices

Easy-to-read well identification text

Black text for excellent contrast

Non warping, even after thermal cycling

Polycarbonate (hard shell) for mechanical stability and flatness

Snug fit to thermal blocks

Thin-wall polypropylene for excellent mechanical fit and heat transfer

Available in common formats

96-well standard, 96-well Fast, 384-well, 5-piece sample packs, 20 & 500 packs

Constructed to ANSI/SBS standard
Well suited for SBS standard robotic handling

Certified DNA-, RNase-, and PCR inhibitor-free

Compatible with and optimized for performance on Applied Biosystems instruments

Options for every format and throughput need

Choose from tubes, tube strips, plates, adhesive film, and accessories for any throughput need. MicroAmp EnduraPlate plastics offer a solution for experiments that require special handling, such as automated or high-throughput workflows, and an even greater degree of durability for use with multi-instrument experiments.

Find out more at thermofisher.com/pcrplastics

The Applied Biosystems™ MicroAmp™ 8-Tube Strip with attached optical caps* is optimally designed for precise real-time PCR with lid and tube labeling, dual end tabs, and 20 μ L graduation marks on each tube to prevent pipetting errors. The 8-tube strips fit in all 0.2 mL Applied Biosystems real-time PCR instruments.

* MicroAmp 8-Tube Strip with attached domed caps is also available for PCR.

Did you know?

Proper plate sealing helps reduce evaporation and well-to-well contamination.

1. Remove the backing of the Applied Biosystems adhesive film.

2. Align the adhesive film so as to cover all wells while placing on the plate.

3. Rub the flat edge of the applicator along the long edge (length) of the plate, then along the short edge (width). Finally, rub the applicator between all the wells and around the outside edges of the plate using small back-and-forth motions to form a complete seal.

Which qPCR plastic fits your needs?

Find the plastic format with the throughput and features for your application

TaqMan and SYBR Green chemistries for real-time PCR

We offer two types of chemistries to detect PCR products using real-time PCR instruments:

- Applied Biosystems™ TaqMan® chemistry (also known as fluorogenic 5' nuclease chemistry)
- Applied Biosystems™ SYBR™ Green I dye chemistry

With over 20 million assays, including gene expression assays for more than 30 species, 5 assay formats, and >40,000 publications, Applied Biosystems™ TaqMan® Assays represent the most trusted and comprehensive collection of qPCR assays available.

Find master mixes, reagents, and kits to power your applications.

	TaqMan chemistry—based detection	SYBR Green dye—based detection
Chemistry overview	Uses a fluorogenic probe to enable detection of a specific PCR product as it accumulates during PCR cycles	Uses SYBR Green I, or similar dye that binds to double-stranded DNA to detect PCR product as it accumulates during PCR
	TaqMan Assays and reagents	SYBR Green reagents
Specificity	High	Low
Sensitivity—low copy number	High	Variable*
Reproducibility	High	Variable*

TaqMan Assays to accelerate your research

Comprehensive, high-quality solutions for genetic analysis

Applied Biosystems™ TaqMan® Assays are the industry-leading choice for 5' nuclease real-time PCR (qPCR) assays. They are cited in more publications than any other qPCR assay product and are considered the gold standard for quantitative genomic analysis. Backed by a performance guarantee,* TaqMan Assays are consistently chosen as a proven solution to reliably provide fast and accurate results.

- **Specificity**—advanced primer/probe sequence selection criteria plus minor groove binder (MGB) probe enhancement deliver the specificity and reproducibility you need for confidence that your results are generated from amplification of the intended target and not from nonspecific dye binding or amplification of closely related genes or pseudogenes
- **Sensitivity**—the nonfluorescent quencher (NFQ) on Applied Biosystems™ TaqMan® probes minimizes background, and intelligent PCR primer and probe design maximizes amplification efficiency; get better sensitivity and accuracy to reliably detect targets present at 10 or fewer copies
- **Reproducibility**—accurately reproduce results from well to well, day to day, and lab to lab, even across manufacturing lots
- **Proven technology**—backed by over 40,000 publications to date

Guaranteed to perform for all of your research needs*

TaqMan Assays cover a broad range of research for a wide variety of applications:

Expression	Genetic variation
<ul style="list-style-type: none">• Gene expression• MicroRNA (miRNA) expression• Long noncoding RNA (lncRNA) expression• Fusion transcript detection• Protein expression	<ul style="list-style-type: none">• Single-nucleotide polymorphism (SNP) genotyping• Drug metabolism enzyme genotyping• Copy number variation (CNV)• Rare somatic mutation detection

Applied Biosystems™ TaqMan® Gene Expression Assays

- Designed to detect virtually any gene product, with more than 2.8 million predesigned assays
- Best-coverage assays available to detect the highest number of transcript variants possible
- Available for 32 species and some microbial pathogens
- Multiple format options—single tubes, 96-well and 384-well plates, TaqMan Array Cards, and OpenArray plates
- Can't find a predesigned assay to meet your needs? Use our Custom Assay Design Tool to design an assay based on your specific target sequence.

Applied Biosystems™ TaqMan® Advanced miRNA Assays

- Detect targets with as few as 60 copies of input microRNA (miRNA) in the cDNA synthesis reaction
- One universal reverse transcription (RT) step for all miRNA assays
- cDNA can be archived for future miRNA studies
- Identify only mature miRNA and distinguish related highly homologous miRNAs with gold-standard TaqMan probe specificity
- Detect and quantify mature miRNA from as little as 1 pg of total RNA or 2 µL of purified plasma or serum

Applied Biosystems™ TaqMan® Noncoding RNA Assays

- For reliable detection and quantitation of noncoding transcripts longer than 200 nucleotides
- Designed to detect only noncoding transcript targets

Applied Biosystems™ TaqMan® Fusion Assays

- Quantify expression level of gene fusions using qPCR
- Orthogonal validation method for confirming next-generation sequencing (NGS) results

* Terms and conditions apply. See full details of the guarantee at thermofisher.com/taqmanperformanceguarantee.

Applied Biosystems™ TaqMan® SNP Genotyping Assays

- Comprise the world's largest predesigned collection, with over 17 million assays
- Rigorous design pipeline with >90 parameters for optimal primer–probe combinations
- Functional quality testing on at least 20 gDNA samples for each assay
- Flexible formats to accommodate any number of targets and samples

Applied Biosystems™ TaqMan® Drug Metabolism Genotyping Assays

- Detect polymorphisms in high-value drug metabolism enzyme (DME) pharmacogenetics markers
- Cover specific SNP alleles, multi-nucleotide polymorphisms (MNPs), and insertions and deletions (indels)
- Targets derived from public databases, consortia, and published articles

Applied Biosystems™ TaqMan® Copy Number Assays

- Evaluate copy number of genomic DNA targets
- Easy to interpret—Applied Biosystems™ CopyCaller™ Software provides the calculated copy number and predicted copy number, along with confidence value and z-score quality metrics
- Fast and simple—setup to primary analysis in 3–4 hours

Applied Biosystems™ TaqMan® Mutation Detection Assays

- Powered by competitive allele-specific Applied Biosystems™ TaqMan® PCR (castPCR™) technology
- Detect and measure somatic mutations in genes associated with cancer research
- Detect rare amounts of mutated DNA in a sample that contains large amounts of normal, wild-type DNA
- Compatible with different sample types, such as cell lines; formalin-fixed, paraffin-embedded (FFPE) tissue; and fresh-frozen tissue samples

Custom TaqMan Probes

Design your own TaqMan primers and probes by choosing from dual-labeled Applied Biosystems™ TaqMan® MGB, QSY™, or TAMRA™ custom probes. TaqMan MGB probes include an MGB moiety at the 3' end that increases the melting temperature (T_m) of the probe and stabilizes probe–target hybrids. TaqMan MGB probes can be significantly shorter than traditional probes, providing better sequence discrimination and flexibility to accommodate more targets. TaqMan QSY probes are available for multiplexing three or more targets and are a seamless replacement for BHQ™ probes.

Flexible formats

A variety of formats to meet your system and throughput needs

TaqMan Assay formats

Configurations to fit your research goals

Are you analyzing hundreds (or thousands) of samples, and expression from a handful of genes? Or does your research involve a few samples that need to be analyzed for a long list of mRNA targets? No matter what experiment you're performing, there's a TaqMan Assay format* perfect for your research needs.

Single tubes

- Low entry price
- Flexible
- Run on any real-time PCR instrument

384-well TaqMan Array Cards

- Low cost per reaction
- Optimal for medium to large projects
- Run on QuantStudio 7 Pro, 7 Flex, and 12K Flex systems, as well as ViiA 7 and 7900HT systems

96- or 384-well plates

- Optimal for small to medium projects
- Balance flexibility with streamlined reaction setup
- Run on 96- or 384-well real-time PCR instrument

* Also available on OpenArray plates for QuantStudio12K Flex System.

TaqMan and SYBR Green master mixes

Applied Biosystems TaqMan and SYBR Green master mixes have been designed to give you the reliable results you need in run times as short as 40 minutes. Master mixes are optimized for specific applications, and the range of sizes available supports users from the occasional to those running qPCR on a daily basis.

Applied Biosystems™ TaqMan® Fast Advanced Master Mix

Accurate, dependable gene expression quantification in less time

- Wide linear dynamic range even on fast cycling instruments (<40 min run time)
- 72-hour pre-PCR benchtop stability enables flexibility in automated workflows
- Compatible with single- and multiplex assays
- Seamlessly transitions into your experiments

Applied Biosystems™ TaqMan® Fast Virus 1-Step Master Mix

Sensitive 1-step quantification of RNA viruses and transcripts, even with challenging samples

- Designed for reliable, high-sensitivity 1-step RT-qPCR to enhance virus and transcript quantification
- Formulated to handle common RT-PCR inhibitors found in blood, stool, and other difficult samples
- Single-tube 4X master mix format enables use of more sample for enhanced sensitivity
- Works in singleplex and multiplex, and with exogenous or endogenous internal controls

Applied Biosystems™ TaqPath™ ProAmp™ Master Mix*

Accurate SNP and CNV genotyping calls in both purified and crude samples

- Reproducible genotyping results even in the presence of inhibitors
- Two formulations that enable single- to four-target detection per reaction

- Compatible with buccal swab and blood crude lysates prepared with the Applied Biosystems™ Extract All Reagents Kit
- 72-hour pre-PCR benchtop stability enables flexibility in automated workflows
- Two formulations that enable single to four-target detection per reaction

Applied Biosystems™ PowerTrack™ SYBR™ Green Master Mix

SYBR Green dye-based gene expression quantification with unrivaled specificity

- Helps reduce pipetting errors with a two-color tracking dye system
- Formulated for superior specificity and tight reproducibility of C_t values over a broad dynamic range
- Broad primer T_m and primer concentration compatibility allows flexibility in qPCR reaction setup with minimal optimization
- Compatible with SuperScript IV VILO Master Mix for fast, reproducible reverse transcription results

TaqMan Fast Advanced Master Mix	1 x 1 mL	4444556
	1 x 5 mL	4444557
	1 x 50 mL	4444558
	1 x 1 mL (no UNG)	A44359
	1 x 5 mL (no UNG)	A44360
	1 x 10 mL (no UNG)	A44361
TaqMan Fast Virus 1-Step Master Mix	1 x 1 mL	4444432
	1 x 10 mL	4444434
	1 x 50 mL	4444436
TaqPath ProAmp Master Mix	1 x 1 mL	A30865
	1 x 10 mL	A30866
	1 x 50 mL	A30867
TaqPath ProAmp Multiplex Master Mix	1 x 1 mL	A30868
	1 x 10 mL	A30869
	1 x 50 mL	A30870
PowerTrack SYBR Green Master Mix	1 mL	A46012
	5 mL	A46109
	50 mL	A46113
	2 x 5 mL	A46110
	5 x 5 mL	A46111
	10 x 5 mL	A46112

* Applied Biosystems TaqPath ProAmp Master Mix is a General Purpose Reagent for Laboratory Use.

** Dynamic range is a property of both the assay and template concentration in the sample, as well as the formulation of the master mix; thus, individual results may vary.

Superior cDNA synthesis performance in RT-qPCR applications

SuperScript IV VILO Master Mix

Invitrogen™ SuperScript™ IV VILO™ Master Mix is a first-strand cDNA synthesis reaction mix for two-step RT-qPCR. The master mix format elevates the trusted VILO technology (Variable Input, Linear Output) to the next level by combining further optimized buffer conditions with the highly processive and thermostable Invitrogen™ SuperScript™ IV Reverse Transcriptase. The master mix offers exceptional performance features while maintaining superior linearity across the broadest range of input RNA.

- **Super-efficient**—C_t values earlier by an average of 2 cycles compared to other reverse transcription reagents, in a 10 min reaction
- **Super-strong**—reliable results even with degraded or inhibitor-containing RNA samples
- **Super-reliable**—improved RT-qPCR data reproducibility due to single-tube master mix format
- **Super-safe**—integrated, easy, and RNA-friendly genomic DNA removal

Find out more at thermofisher.com/4vilo

Doing other cDNA synthesis applications?

The SuperScript IV Reverse Transcriptase portfolio of products is engineered to offer superior cDNA synthesis performance with even the most challenging RNA samples. The portfolio includes a stand-alone enzyme, first-strand cDNA synthesis kit, and one-step RT-PCR kit. Learn more when you flip the brochure to the PCR side.

	500 reactions	11766500

Did you know?

SuperScript IV VILO Master Mix is available in a format with the novel dsDNA-specific Invitrogen™ ezDNase™ enzyme, which offers convenient and fast genomic DNA removal from RNA samples to help ensure high confidence in RT-qPCR results.

Why isolate RNA when you don't have to?

SuperScript IV CellsDirect cDNA Synthesis Kit

The Invitrogen™ SuperScript™ IV CellsDirect™ cDNA Synthesis Kit is designed to synthesize first-strand cDNA directly from mammalian cell lysates without first isolating the RNA. With lysis and reverse transcription (RT) performed in the same tube, the resulting first-strand cDNA is ready to use in many downstream applications such as PCR and qPCR.

Key benefits of this easy-to-use format

- **Time-saving**—save up to 2 hours in overall workflow time
- **Superior sensitivity**—easy detection of low-abundance targets
- **Direct convenience**—no need to isolate RNA
- **qPCR compatibility**—superior performance with PowerTrack SYBR Green Master Mix

Connect with your instrument and achieve lab/life balance

Instrument Connect app

Thermo Fisher Scientific has pioneered a way to connect you to your instruments, giving you real-time updates on your run and access to data as they come up. We connect you to your cloud-enabled instruments and benchtop devices anytime, anywhere using the Instrument Connect mobile app.

The Instrument Connect remote monitoring app allows you to stay connected to any of our cloud-enabled instruments, including the QuantStudio 1, 3, 5, 6 Pro, and 7 Pro real-time PCR instruments, as well as endpoint PCR devices including Applied Biosystems™ ProFlex™, SimpliAmp™, and MiniAmp™ thermal cyclers.

With the Instrument Connect app, you can:

- Check the availability of your cloud- and network-connected device
- Monitor run progress

- View amplification plots in real time (available for QuantStudio 1, 3, 5, 6 Pro, and 7 Pro real-time PCR instruments)
- View plots and filter by sample or target in real time
- Schedule an instrument

It's easy to get started. Just download the Instrument Connect app from the Apple™ App Store or Google Play™ Store and log in to your account on the Connect Platform. You can view your connected instruments, monitor remaining time in your run, and view your amplification plots in real time.

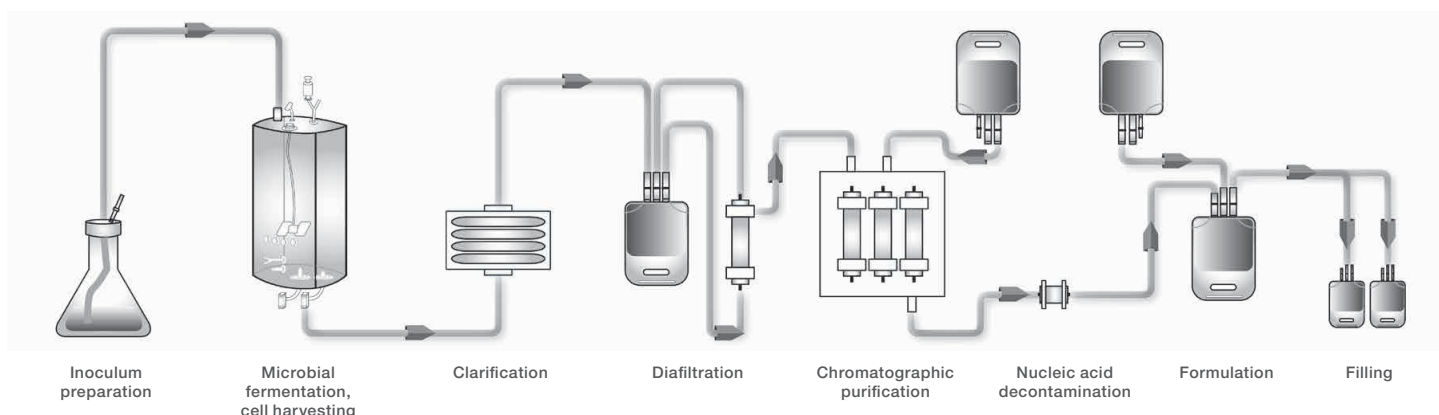

Learn more about the Instrument Connect app at thermofisher.com/connect

Specialty enzymes for molecular diagnostics development and commercial supply

We offer innovative enzymes, dNTPs, and buffers for your molecular assay development. Our products are manufactured in-house, conform to internationally acceptable standards of quality, and provide you with 24/7 access to our dedicated OEM support team to meet your unique applications.

For more information about our enzymes for commercial supply, go to thermofisher.com/oemenzymes

Closed, SUS-based manufacturing process for recombinant enzymes. A completely closed system using disposable single-use bags, tubes, and connectors reduces the potential DNA contamination from the environment, human operator, and cross-contamination to a negligible level.

DNA-free enzymes*

DNA-free PCR enzymes are manufactured using our single-use system (SUS). These enzymes are:

- Manufactured in a completely closed system using dedicated or single-use equipment
- Verified free of contaminating DNA from host, human operator, and environment

Learn more at thermofisher.com/dna-free

Lyo-ready enzymes

From Platinum *Taq* DNA polymerases to SuperScript reverse transcriptases, we offer the largest selection of lyophilization-compatible enzymes, providing:

- Flexible assay designs while retaining the same functional enzyme performance as with conventional formats
- Tailor-made solutions for your specific applications, including custom packaging
- Higher confidence in results with low residual DNA contamination (human and bacterial) of enzymes

Learn more at thermofisher.com/lyo-ready

* Platinum *Taq* DNA Polymerase, DNA-free, is available as a catalog product.

Real-time PCR educational resources

Do you want to learn more about real-time PCR? Find answers to common questions and learn the basics in our online education hub. Make your results “ever better” by improving your knowledge at your own pace. You can learn about:

- The difference between absolute and relative quantification
- Benefits of fast real-time PCR
- Multiplexing
- And so much more
