

SciCan BRAVO™

Chamber Autoclaves

THE PERFECT BLEND of Speed and Capacity

BRAVO™ is a class B fractionated vacuum sterilizer that incorporates both pre-vac (to remove air) and post-vac (to ensure a dry load every time) cycles, for efficient operation.

Fast

BRAVO™ 17/17V and 21V are one of the fastest chamber autoclaves on the market, sterilizing and drying instruments in as little as 24 - 28 minutes*.

Gentle

The fresh water feature guarantees fresh water with every cycle. Fresh water reduces the build up of oils and debris.

Versatile

The BRAVO offers numerous sterilization cycles with a wide array of parameters. This allows the user to choose the appropriate cycle for the load, be it wrapped or unwrapped.

Dry

With closed door drying and vacuum technology, the BRAVO™ gives fast and consistent dry loads every time.

Capacity

BRAVO™ 17/17V can sterilize 3 full-size cassettes or up to 20 pouches.

BRAVO™ 21V can sterilize 3 oral surgery cassettes or up to 25 pouches.

Cycle Recording

The BRAVO saves all the data from each cycle. The integrated front USB port allows cycle data to be stored digitally making record keeping simple and efficient. BRAVO units can also be ordered with an integrated printer.
