Stomacher® 80 Biomaster

Small tissue processing solutions for clinical and life science microbiology

The **Stomacher® 80 Biomaster** and **Stomacher® 80 microBiomaster** provide small tissue processing solutions for clinical, life science and microbiology applications. Capable of processing samples from 250µl to 80ml, the Biomaster range caters for the increased demand for smaller samples without reducing sample quality.

The **Stomacher® 80 Biomaster** (5ml to 80ml sample capacity), **microBiomaster** (250µl to 80ml sample capacity) and **Stomacher® Bags** allow samples to be processed safely and without risk of cross contamination while maximising visible cell recovery. Tens of thousands of referenced

methods are available and now with the enhanced sample capacity range of the microBiomaster the **Stomacher® 80** is the World's most efficient and versatile sample preparation system for life science applications.

Choose the microBiomaster for increased sampling volume range with the new microBag for effective homogenization and sample recovery below 1ml volumes.

Why the Stomacher® 80?

Adjustable process times
& paddle speeds

Proven enhancement in
cell recovery & viability

No risk of cross
contamination

Process samples
from 250µl - 80ml

Cost effective sample

Stomacher® 80 Biomaster

The **Stomacher® Bag** Range has been designed to fulfil all applications from blending, straining and storage including bags designed specifically for life science applications.

Enhanced **Stomacher® 80 Bag** range features closure and strainer bag formats, double bags for biosafety and the new microBag for effective homogenisation and sample recovery below 1ml volumes.

Seward Bag racks provide the perfect storage for **Stomacher® Bag** sample handling, helping to provide a clean and productive working environment.
