# ELECTROSURGERY

## FOR THE HOSPITAL OPERATING ROOM AND SURGERY CENTER

ELECTROSURGICAL GENERATOR

### CUTTING EDGE

300 Watts of Cutting power

### CONVENIENCE

Ten (10) Doctor Presets for quick, uncomplicated setup between procedures

### VERSATILITY

Offers two (2) modes of Pure Cut, ten (10) modes of Blend, two (2) modes of Coagulation, Bipolar Coagulation and BovieFCFS™ technology allowing the Doctor to move almost effortlessly from Monopolar to Bipolar during procedure

### INTELLIGENCE

The IDS-300 is designed with BovieDFFS™ technology measuring tissue impedance 5,000 times a second for consistent energy delivery into varying tissue types

### SECURITY

The IDS-300 is designed with state-of-the-art safety features including Bovie NEM™ pad sensing technology which monitors the return electrode for optimum patient protection. BovieDED™ monitors all functions of the generator to ensure constant safety for the patient, doctor and OR staff

### RELIABILITY

The IDS-300 is backed by Bovie's two (2) year manufacturer's limited warranty
