

# MORE ACCESS AND CLARITY FOR YOU. MORE COMFORT FOR YOUR PATIENTS.

Introducing the next generation  
of TruClear™ hysteroscopes

TruClear™ Elite Hysteroscope Mini  
(6 mm outer diameter)

TruClear™ Elite Hysteroscope Plus  
(7.25 mm outer diameter)

# EASIER INSERTION. BETTER RESOLUTION.†

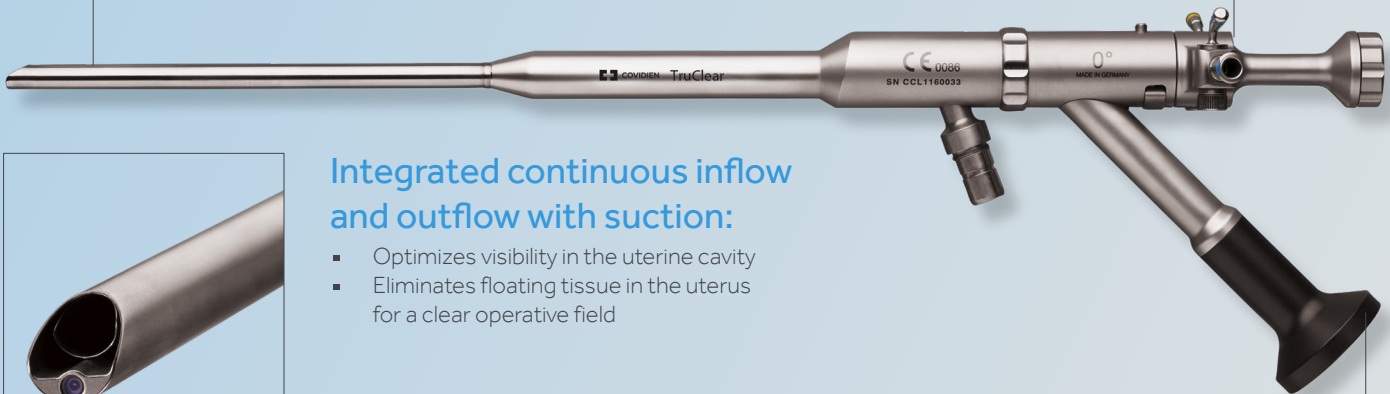

Our new TruClear™ Elite hysteroscopes provide a minimally invasive solution for diagnosing and treating fibroids, polyps, and other intrauterine abnormalities. They're designed to deliver next-generation hysteroscopy to your office or OR today.

## The long working channel provides:

- Access to the entire uterus — including the cornua and fundal wall
- A length that works for most patient populations

## The improved seal‡:

- Minimizes fluid leakage
- Is disposable for convenient post-procedure cleaning

## Integrated continuous inflow and outflow with suction:

- Optimizes visibility in the uterine cavity
- Eliminates floating tissue in the uterus for a clear operative field

## The angled tip:

Enables easier insertion through the cervical canal and into the uterus

## The rod lens optical system delivers:

- High-definition (HD) images
- New possibilities: the TruClear™ Elite hysteroscope mini has the smallest rod lens system currently available for mechanical intrauterine tissue removal‡

## Simplicity for Your Office

The TruClear™ Elite hysteroscope mini delivers crisp images and incisionless tissue removal. It's ideal for your office because it:

- Allows you to complete procedures with little to no dilation
- Enables quick and easy assembly and operation
- Enhances the TruClear™ system office-based portfolio

†Compared to legacy TruClear™ hysteroscopes.

‡Compared to competitive devices as of January 2018.

# ORDERING INFORMATION
