

Test Equipment Solutions Datasheet

Test Equipment Solutions Ltd specialise in the second user sale, rental and distribution of quality test & measurement (T&M) equipment. We stock all major equipment types such as spectrum analyzers, signal generators, oscilloscopes, power meters, logic analysers etc from all the major suppliers such as Agilent, Tektronix, Anritsu and Rohde & Schwarz.

We are focused at the professional end of the marketplace, primarily working with customers for whom high performance, quality and service are key, whilst realising the cost savings that second user equipment offers. As such, we fully test & refurbish equipment in our in-house, traceable Lab. Items are supplied with manuals, accessories and typically a full no-quibble 2 year warranty. Our staff have extensive backgrounds in T&M, totalling over 150 years of combined experience, which enables us to deliver industry-leading service and support. We endeavour to be customer focused in every way right down to the detail, such as offering free delivery on sales, covering the cost of warranty returns BOTH ways (plus supplying a loan unit, if available) and supplying a free business tool with every order.

As well as the headline benefit of cost saving, second user offers shorter lead times, higher reliability and multivendor solutions. Rental, of course, is ideal for shorter term needs and offers fast delivery, flexibility, try-before-you-buy, zero capital expenditure, lower risk and off balance sheet accounting. Both second user and rental improve the key business measure of Return On Capital Employed.

We are based near Heathrow Airport in the UK from where we supply test equipment worldwide. Our facility incorporates Sales, Support, Admin, Logistics and our own in-house Lab.

All products supplied by Test Equipment Solutions include:

- No-quibble parts & labour warranty (we provide transport for UK mainland addresses).
- Free loan equipment during warranty repair, if available.
- Full electrical, mechanical and safety refurbishment in our in-house Lab.
- Certificate of Conformance (calibration available on request).
- Manuals and accessories required for normal operation.
- Free insured delivery to your UK mainland address (sales).
- Support from our team of seasoned Test & Measurement engineers.
- ISO9001 quality assurance.

The TDS3000B Series of Digital Phosphor Oscilloscopes Provides Unmatched Performance and Portability at an Affordable Price

The TDS3000B packs the power of a DPO, digital real-time (DRT) sampling technology, WaveAlert waveform anomaly detection, OpenChoice documentation and analysis solutions and five application-specific modules into a lightweight, battery-capable design.

A DPO Provides a Greater Level of Insight into Complex Signals

The TDS3000B Series DPO delivers 3,600 wfms/s continuous waveform capture rate to capture glitches and infrequent events three times faster than comparable oscilloscopes. Some oscilloscope vendors claim high waveform capture rates for short bursts of time, but only DPOs can deliver these fast waveform capture rates on a continuous basis – saving minutes, hours or even days by quickly revealing the nature of

► The TDS3000B DPO provides unmatched insight into complex signal behavior, such as metastable events.

faults so advanced triggers can be applied to isolate them.

In addition, the TDS3000B DPO's real-time intensity grading highlights the details about the "history" of a signal's activity, making it easier to understand the characteristics of the waveforms you've captured.

Higher Speeds Demand Greater Bandwidth

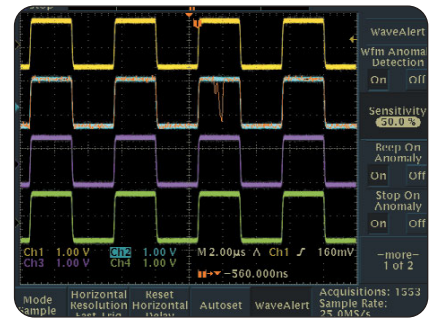

You face faster clock rates and edge speeds, increasingly complex signals and mounting time-to-market pressures. The higher the bandwidth of your oscilloscope, the more accurate the reproduction of your signal. The TDS3000B Series offers a wide range of bandwidths from 100 MHz to 600 MHz to best suit the needs of your most demanding projects, so that you can complete your tasks on time and with confidence.

Quickly Debug and Characterize Signals with DRT Sampling Technology and Sin(x)/x Interpolation

The TDS3000B Series combines unique digital real-time (DRT) sampling technology with sin(x)/x interpolation to allow you to accurately characterize a wide range of signal types on all channels simultaneously. This sampling technology makes it possible to capture high-frequency information, such as glitches and edge anomalies, that eludes other oscilloscopes in its class, while sin(x)/x interpolation ensures precise reconstruction of each waveform. The result – a complete view of your signal to speed debug and characterization.

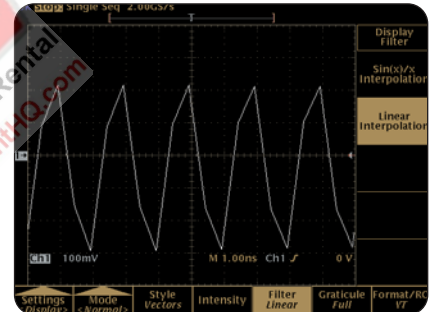

- An increase in performance from 500 to 600 MHz bandwidth offers a 20% improvement in rise-time measurement accuracy, as illustrated with these measurements of a 20 ps rising edge. The lower trace is a reference waveform, showing the rise-time performance of a 500 MHz oscilloscope. The upper trace shows the improved performance of a 600 MHz oscilloscope.

- WaveAlert™ waveform anomaly detection alerts you to any waveform that deviates from the “normal” input, such as the glitch on channel 2.

- The TDS3054B's 5 GS/s real-time sample rate and sin(x)/x interpolation ensure accurate reconstruction of a 500 MHz sine wave.

- Even with 2 GS/s sample rate, which exceeds the Nyquist requirement of 2X oversampling, this 500 MHz oscilloscope with linear interpolation does not provide accurate reconstruction of the same 500 MHz sine wave.

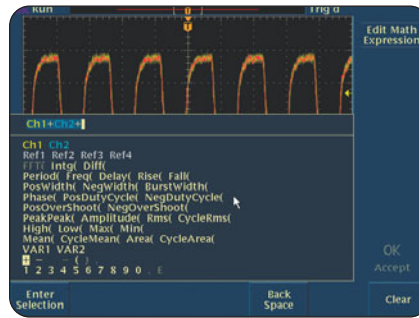

Enhanced Troubleshooting Ability

WaveAlert™ waveform anomaly detection speeds your troubleshooting tasks by helping you find those elusive problems faster. WaveAlert detection monitors the incoming signals on all channels and will detect and highlight any waveform that deviates from the normal waveform being

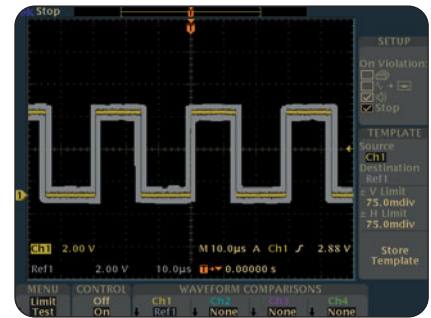

acquired. Because the TDS3000B oscilloscope can stop acquisition, sound a beep, make a hard copy or save the waveform when it detects an anomaly, you can run tests over long time periods – even unattended – to find those challenging, very infrequent failures.

- Look for unintentional circuit noise with the TDS3000B Series' FFT capability.

- TDS3AAM Advanced Analysis Module delivers advanced waveform math.

- The TDS3000B DPO with the TDS3LIM limit testing module is ideal for manufacturing test applications where fast Go/No-Go decisions are required.

Simple, Speedy Documentation and Analysis

OpenChoice® solutions deliver simple, seamless integration between the oscilloscope and the PC. Using a standard built-in Ethernet port, e*Scope® web-based remote control allows you to control your TDS3000B oscilloscope from anywhere, using the Internet and your PC. With the optional TDS3GV communication module, floppy disk, TDSPCS1 OpenChoice software and integration with third-party software, the TDS3000B Series provides you with multiple choices to easily capture, transfer, document and analyze your measurement results. This seamless integration extends the power and value of these brilliantly engineered, affordable oscilloscopes.

Flexible Features for Every Application

Optional application modules enable you to transform your oscilloscope into a specialized tool for limit testing, telecommunications mask testing, and video troubleshooting. And, with its lightweight, compact size and battery pack, the TDS3000B Series oscilloscope can go wherever it is needed. It weighs only 4.5 kilograms (9.8 lbs), with battery installed. Use the optional plug-in thermal printer to instantly document your work, even in the field.

TDS3AAM Advanced Analysis Module

Module – Adds extended math capability, arbitrary math expressions, measurement statistics and additional automated measurements.

TDS3LIM Limit Testing Module –

Offers fast, accurate Go/No-Go verification that tested circuits are operating within intended parameters.

TDS3TMT Telecommunications

Mask Testing Module – Pass/Fail compliance of ITU-T G.703 and ANSI T1.102 standards, custom mask testing and more.

TDS3VID Extended Video Editing

Module – Adds Video QuickMenu, autoset, holdoff, line count trigger, video picture mode, vectorscope mode^{*1}, HDTV format triggering graticules and more.

TDS3SDI 601 Serial/Digital Video

Module – Identify and analyze ITU-R BT.601 video signals, video picture mode with bright line select, vectorscope mode^{*1}, HDTV format triggering and more.

^{*1} Vectorscope does not support composite video.

- TDS3000B DPO provides breakthrough test speeds for telecommunications line card testing. The telecom QUICKMENU puts all the commonly used telecom testing functions on a single menu.

- Custom video trigger allows the TDS3000B to trigger on standards such as RS343 (26.2 kHz scan rate).

- Trace and identify ITU-R BT.601 video signals with the TDS3SDI 601 serial digital video module.

Acquisition Modes

DPO – Captures and displays complex waveforms, random events and subtle patterns in actual signal behavior. DPOs are able to provide 3 dimensions of signal information in real time: Amplitude, time and the distribution of amplitude over time.

Peak Detect – High frequency and random glitch capture. Captures glitches as narrow as 1 ns.

WaveAlert™ – Monitors the incoming signals on all channels and alerts the user to any waveform that deviates from the normal waveform being acquired.

Sample – Sample data only.

Envelope – Max/Min values acquired over one or more acquisitions.

Average – Waveform data from 2 to 512 (selectable) acquisitions is averaged.

Single Sequence – Use the Single Sequence button to capture a single triggered acquisition sequence at a time.

Trigger System

Main Trigger Modes – Auto (supports Roll Mode for 40 ms/div and slower), Normal.

B Trigger – Trigger after time or events.

Trigger After Time Range – 13.2 ns to 50 s.

Trigger After Events Range – 1 to 9,999,999 events.

External Trigger Input – >1 M Ω in parallel with 17 pF; Max input voltage is 150 V_{RMS}.

Trigger Types

Edge – Conventional level-driven trigger. Positive or negative slope on any channel. Coupling selections: DC, noise reject, HF reject, LF reject.

Video – Trigger on all lines, odd, even or all fields. With TDS3VID or TDS3SDI, trigger on individual lines and on analog HDTV formats (1080i, 1080p, 720p, 480p).

Logic – PATTERN: Specifies AND, OR, NAND, NOR when true or false for a specific time.

STATE: Any logic state. Triggerable on rising or falling edge of a clock. Logic triggers can be used on combinations of 2 inputs (not 4).

Pulse –

WIDTH (or GLITCH): Trigger on pulse width less than, greater than, equal to or not equal to a selectable time limit ranging from 39.6 ns to 50 s.

RUNT: Trigger on a pulse that crosses one threshold but fails to cross a second threshold before crossing the first again.

SLEW RATE: Trigger on pulse edge rates that are either faster or slower than a set rate. Edges can be rising, falling, or either.

Comm (requires TDS3TMT) – Provides isolated pulse triggering required to perform DS1/DS3 telecommunications mask testing per ANSI T1.102 standard.

Alternate – Sequentially uses each active channel as a trigger source.

Measurement System

Automatic Waveform Measurements –

Period, Frequency, +Width, –Width, Rise Time, Fall Time, +Duty Cycle, –Duty Cycle, +Overshoot, –Overshoot, High, Low, Max, Min, Peak-to-Peak, Amplitude, Mean, Cycle Mean, RMS, Cycle RMS, Burst Width, Delay, Phase, Area², Cycle Area². Display any four measurements from any combination of waveforms. Or display all measurements with measurement snapshot feature. Measurement statistics².

Thresholds – Settable in percentage or voltage.

Gating – Measurements can be gated using the screen or vertical cursors.

² Requires TDS3AAM module.

Waveform Processing

Deskew – Channel-to-channel deskew ± 10 ns may be manually entered for better timing measurements and more accurate math waveforms.

Arithmetic Operators – Add, subtract, multiply, divide, arbitrary math expressions^{*2}.

Autoset – Single-button, automatic setup on selected input signal for vertical, horizontal and trigger systems.

Display Characteristics

Waveform Style –

Dots, vectors and variable persistence.

Graticules – Full, grid, cross-hair, and frame. NTSC, PAL, SECAM, and vectorscope (100% and 75% color bars) with optional TDS3VID and TDS3SDI video application modules.

Format – YT, XY and Gated XYZ (XY with Z-axis blanking available on TDS30X4B only).

I/O Interface

Hard Copy Port (standard) –

Centronics-type parallel.

Ethernet Port (standard) –

10base-T LAN, RJ-45 female.

TDS3GV Communications Module – GPIB

(IEEE 488.2) programmability: Full talk/listen modes; control of all modes, settings and measurements.

VGA: Monitor output for direct display on large VGA-equipped monitors. DB-15 female connector, 31.6 kHz sync rate, EIA RS-343A compliant.

RS-232-C interface programmability: Full talk/listen modes; control of all modes, settings and measurements. Baud Rate up to 38,400. DB-9 male connector. Programmer manual: 071-0381-02.

^{*2} Requires TDS3AAM module.

Hard Copy Capability

Graphics File Formats – Interleaf (.img), TIF, PCX (PC Paintbrush), BMP (Microsoft Windows) and Encapsulated Postscript (EPS).

Printer Formats – Bubblejet, DPU-3445, Thinkjet, Deskjet, Laserjet, Epson (9- and 24-Pin).

Environmental and Safety

Temperature – +5 °C to +50 °C (operating), –20 °C to +60 °C (nonoperating).

Humidity – 20% to 80% RH below 32 °C, derate to 30% RH at 45 °C (operating), 5% to 90% RH below 41 °C, derate to 30% RH at 60 °C (nonoperating).

Altitude –

To 3,000 m (operating), 15,000 m (nonoperating).

Electromagnetic Compatibility – Meets or exceeds EN55011 Class A radiated and conducted emissions; EN50082-1; FCC 47 CFR, Part 15, Subpart B, Class A; Australian EMC framework; Russian GOST EMC regulations.

Safety –

UL3111-1, CSA1010.1, EN61010-1, IEC61010-1.

A Critical Component of the Complete

Measurement Solution. The AFG300 Series arbitrary function generator with ArbExpress™ waveform editing software pairs with the TDS3000B, TPS2000, TDS2000 and TDS1000 Series digital oscilloscopes to deliver the two elements of a complete measurement solution – stimulus and acquisition. The AFG300 combines the capabilities of a function generator with the power of an arbitrary waveform generator, offering the performance needed to accurately verify, validate and characterize designs with ease and confidence, all at a price you can afford.

Tektronix Support Completes the Solution. We know you depend on Tektronix instrument solutions when you make and meet critical commitments. So we make and meet a support commitment you can depend on. Anytime you

need support, anywhere in the world, Tektronix Support gives you the lowest possible exposure to inconvenience, delay or disruption of operations.

- Unsurpassed technical expertise and experience with 24-hour response to technical questions
- Interactive, online support to request assistance, check service status or arrange for training
- Industry-leading turn-around service time
- Credible, reliable support with demonstrated on-time delivery
- 90-day unconditional service warranty
- No fine print, no exclusions, no surprises
- Global support in more than 50 countries
