**MIDMARK VALUE PACKAGE – EXCLUSIVE OPERATORY
PACKAGES FOR LARGER DENTAL ORGANIZATIONS**

EFFICIENCY. LONGEVITY. ATTAINABILITY.

FOR LARGER DENTAL ORGANIZATIONS

CHOICE OFFERINGS OF OUR MOST POPULAR AND RELIABLE OPERATORY SOLUTIONS FOR THE DEMANDS OF A BUSY DENTAL PRACTICE

01| The UltraTrim® Dental Chair offers exceptional clinician access to the patient with a chair back that is 40% thinner than our standard chair back. The patented design features a cast-aluminum structure for durability, with integrated armrests that are positioned for unencumbered patient entry and exit. UltraComfort® chair also available.

Midmark chairs come standard with programmable chair controls and a hydraulic drive system for smooth, quiet, precise operation. Available in your choice of seamless Silhouette, plush Ultraleather® and a limited-seams version of Ultraleather upholstery.

02| Our operatory lighting, in your choice of halogen or LED, offers true, reduced-shadow white light so you can properly identify shades and details for accurate diagnosis of tissue pathology. The LED Dental Operatory Light provides an energy-efficient alternative to halogen with only 22 watts of power consumption—50% less than the leading dental LED light.

03| The Asepsis 21® Delivery System offers superior reliability and peace of mind knowing that its removable surfaces are easy to clean, promoting improved asepsis at the point of care. Shown with optional chair control upgrade.

04| The Assistant's Delivery Unit option puts instruments within easy reach and includes HVE, SE, and water quick-connect.

05| The left/right configuration maximizes flexibility and is designed to allow instruments to be positioned virtually anywhere around the chair. In addition to the left/right configuration, choose from console-mounted or rear cabinet-mounted delivery.

Optional cuspidor (not shown) enhances patient experience with easy access. Its durable design is specially manufactured in Italy using fine vitreous china.

See Ordering Guide for all available MVP packages.

Choose the Midmark Value Package that is right for your practice, delivering advanced ergonomics, safety and performance you can count on.

MVP OPERATORY EQUIPMENT

Midmark delivery units are designed from the inside out to complement the way you work. The Midmark Asepsis 21® Delivery Unit provides quality and reliability in a sleek, compact, value-priced package.

All Midmark delivery units offer the unsurpassed smooth operation of our patented Kink Valve® technology, virtually eliminating turbulence to provide the ultimate in fine flow control. Tested to over one million cycles, the self-aligning properties of our low-maintenance valves minimize stress and extend lifespan for reliability you can depend on.

The advanced design of Midmark LED and halogen operatory lights deliver the true, reduced-shadow white light you need to properly match shades, identify details and make diagnoses with confidence. The automatic on/off function maximizes energy efficiency, while the upfront touchpad control system make the lights easy to use.

01| The Asepsis 21® LR Delivery Unit provides quality and reliability in a left-right configuration for a sleek, compact value-priced package. Air and water controls are protected from contamination beneath an easily removable top. Our patented Kink Valve® technology delivers smooth flow and fine control with exceptional reliability.

The Procenter Assistant's Unit offers fine needle-valve adjustments for greater flow precision of drive air and lavage. Integrated ancillary devices include intraoral cameras, ultrasonic scalers, a curing light and up to two electric motors.

02| The Asepsis 21 Cabinet-Mounted Delivery Unit offers the same quality and reliability of the Asepsis 21 with the flexibility of a cabinet-mounted 12-o'clock delivery configuration.

03| The Midmark LED Dental Operatory Light offers energy efficiency and delivers true, reduced-shadow white light that allows you to properly identify shades, see details and evaluate tissues. The ergonomic design offers complete control, with pull, tilt and twist options, as well as easy access to the touchpad. Conveniently select from three light intensities in operate mode, or easily switch to composite mode for filtered light that prevents premature curing.

04| The Midmark Halogen Dental Operatory Light delivers true, reduced-shadow, white incandescent light that helps to properly identify shades, see details and evaluate tissues.

WHAT YOU GET WITH MIDMARK

Efficiency. Longevity. Attainability.

When you choose Midmark, you get so much more than a product. You get a partner with decades of hands-on manufacturing expertise, inspired design innovation, and landmark thought leadership in workflow efficiency. Take advantage of our broad portfolio of best-in-class core dental equipment to build the operatory you desire, and buy with confidence. With extensive warranties dedicated technical support, we're right by your side the moment you need us.

Warranty and Service

We stand by the quality and reliability of our products - that is why we offer a standard five-year limited, parts-only warranty for products purchased through an authorized Midmark dealer (see midmark.com/support/warranty for full warranty details). In addition to warranty, Midmark has a large team of expert customer experience and technical support representatives that will assist you with any product questions regarding installation and service.
