

EMSCULPT NEO

CORE TO FLOOR

After the age of 30, one loses roughly 3% to 5% of one's muscle mass per decade.

Weak muscles and lack of exercise leads to strength, balance, posture and discomfort issues.

- 1 66% of women with abdominal separation have pelvic floor disorders.*
- 2 Every 11 seconds an older adult is treated in the emergency room for losing balance and falling.*

Core to floor therapy utilizes two HIFEM procedures to strengthen, firm and tone the abdomen and pelvic floor muscles. The result is increased muscle growth and restoration of neuromuscular control, which can improve strength, balance, posture, and incontinence as well as potentially alleviate back discomfort.

EMSCULPT NEO

BECAUSE MUSCLE MATTERS

To keep your body healthy and strong, you must build your muscles.

EMSCULPT NEO is an innovative technology that uses high intensity electromagnetic field to build muscles and strengthen your body non-invasively.

20 Peer Reviewed Publications*

THE SCIENCE IS WHY PEOPLE ARE SAYING YES TO EMSCULPT NEO

EMSCULPT NEO is FDA cleared and clinically tested procedure that has helped patients across the world achieve a better version of themselves without surgery or downtime.

NON-INVASIVE

WALK-IN WALK-OUT PROCEDURE

HOW DOES IT WORK?

Skin, fat and muscle form your overall body appearance. The non-invasive HIFEM® procedure induces powerful muscle contractions not achievable through voluntary contractions. The skin remains unaffected while the energy penetrates to deeper layers of the tissue.

This results in substantial improvement of your appearance. The body responds with a deep remodeling of its inner structure that leads to muscle building and sculpting your body.

EMSCULPT NEO

PELVIC FLOOR

A Breakthrough Treatment for Incontinence and Pelvic Floor Muscles Rehabilitation.

SOUNDS FAMILIAR?

- 1 Do you feel a sudden, urgent need to urinate, followed by accidental leakage?
- 2 Urine leakage is brought on by quick movements or pressure, such as from coughing or laughing?
- 3 Is incontinence frequent or affecting your quality of life?

Weak pelvic floor muscles insufficiently support pelvic organs and affect bladder control. **EMSCULPT NEO** effectively stimulates these muscles which establishes control over the bladder.

SAY NO TO INCONTINENCE

EMSCULPT NEO uses an unique **EMSELLA** chair applicator to induce thousands of Kegel-like contractions in just a single session helping patient with accidental leakage and improving their quality of life.

“I have regained my confidence because of my treatment and intend to resume my sport activities.”

Amanda, Houston, TX

HAVE QUESTIONS?

- **Am I a CANDIDATE?**

Anyone can benefit from EMSculpt NEO procedure. Ask your provider for more details.

- **What is the TREATMENT time?**

Your provider can help you with individually tailored treatment plans based on your goals.

- **Is there any DOWNTIME? Any pre/post treatment preparation?**

Emsculpt NEO is non-invasive and requires no recovery time or pre/post treatment preparation.

- **What does it FEEL like?**

Emsculpt NEO procedure feels like an intensive workout. Many people relax during the treatment. You may resume daily activities immediately after the treatment.

- **Does it really WORK?**

Patient results may vary. Emsculpt NEO has been clinically tested for safety and efficacy through several clinical studies.*

- **How fast will I see RESULTS?**

You begin to feel tangible results right after the treatment. Positive results are usually reported two to four weeks after the last session and continue to improve for several weeks following the treatments.

HARPER'S BAZAAR
The aesthetic treatment trends that will be big for 2020
January 15, 2020
Body treatments are having a moment. In January you may not want that Top Gun Clinx, non-invasive treatment, but Emsculpt is a body-toning treatment that tones built-in muscles. It's also ideal for postpartum women. Its compact, 30-minute session will continue into 2020, as will the launch of Emsculpt Neo this year." says Dr. Oshin.
