

Agilent
CrossLab

From Insight to Outcome

Agilent Supplies

FOR PerkinElmer ICP-OES AND ICP-MS SPECTROMETERS

Agilent Technologies

INSIGHT TO OUTCOME WITH AGILENT CROSSLAB

Built on decades of Agilent leadership and innovation, Agilent CrossLab is a comprehensive, coordinated method of providing services, consumables, and software to dramatically improve laboratory efficiency and productivity regardless of the instrument platform you're working with. Agilent CrossLab connects you to a global team of scientific and technical experts who deliver vital, actionable insights at every level of the lab environment. Insights that help you maximize performance, reduce costs, and ultimately drive improved economic, operational, and scientific outcomes. Only Agilent CrossLab offers the unique combination of innovative products and comprehensive solutions that generate immediate results and lasting impact. Across your lab, around the world, every step of the way.

Your trusted partner in spectroscopy supplies and services

Put Agilent innovation and quality to work on your PerkinElmer instruments

As a global leader in spectroscopy, Agilent has the expertise to boost the performance and productivity of your PerkinElmer ICP-OES and ICP-MS systems. With Agilent, you benefit from consolidated ordering of all parts in your workflow, with the services needed to keep your lab running at optimal conditions. Take advantage of Agilent as the single point of contact for all your needs.

- Parts qualified on genuine PerkinElmer systems
- Guaranteed to be compatible with PerkinElmer instruments
- Backed by the Agilent Stand Behind Warranty that guarantees the parts will not cause instrument failure or downtime
- Experienced Agilent service engineers always ready to help with a wide range of solutions that maximize performance, minimize downtime, and optimize the productivity of your PerkinElmer instruments
- Many parts in Agilent packaging designed to be more durable, sturdy and provide the best protection during shipping to ensure the part arrives with no damage
- Full portfolio of Atomic Absorption, ICP-OES and ICP-MS consumables, standards, and services to ensure your PerkinElmer system runs at peak performance
- Worldwide best-in-class technical support team to answer questions regarding part fit, function, or application-specific questions and concerns to help you get the most out of your PerkinElmer system
- In stock and available worldwide for 24 to 48 hour delivery (in most regions)
- Instruction guides and how-to videos ensure you get the best performance from your PerkinElmer system, using our parts and supplies

CROSSLAB SERVICES

Service expertise and convenience from Agilent CrossLab

Agilent CrossLab service engineers have the skills, qualifications, and experience to deliver all your lab's instrument services — regardless of manufacturer. As an industry leader in designing, manufacturing and servicing laboratory equipment, we have the expertise to consolidate all your service needs into one single, convenient agreement. Whatever your laboratory configuration, Agilent CrossLab offers an onsite service to deliver the exact level of support that best meets your goals and budget. Choose from a range of service options that maximize throughput, ensure compliance and minimize costly downtime. With a solution for every service that you might need, and to protect your lab against the unknown, our service plans let you choose the service level that meets your needs, goals and budget.

- **Agilent CrossLab Gold** — for mission-critical systems from multiple manufacturers, the Agilent CrossLab Gold service plan provides the optimum mix of proactive scientific instrument service that prevents instrument downtime and high priority onsite support for the fastest response to your service requests. When you simply cannot afford downtime, our Gold service plan provides the level of high-availability support you need.
- **Agilent CrossLab Silver** — for dependable lab operations, Agilent CrossLab Silver helps minimize workflow disruptions and optimize productivity in laboratories with equipment from multiple manufacturers. You get comprehensive instrument repair and maintenance coverage in a single, convenient lab service plan — providing you exactly the level of service you need to ensure reliable instrument performance.
- **Agilent CrossLab Bronze** — covers all required onsite repair visits, instrument parts, and consumables to get your system back online without delay. Eliminate unplanned repair costs for your laboratory instruments from various manufacturers with the Bronze service plan. This service, delivered by experienced technicians, ensures that you are fully protected against costly repairs and extended instrument downtime.

AGILENT ATOMIC SPECTROSCOPY PORTFOLIO

Agilent 5100 Series ICP-OES

The fastest ICP-OES... ever

- The 5100 ICP-OES can run your samples faster, using less gas, without compromising performance
- The 5100 SVDV ensures the fastest sample throughput and lowest gas consumption per sample of any ICP-OES
- The vertical torch and robust solid state RF also handles your toughest samples with ease

Agilent 7800 ICP-MS

Solution-ready

- Proven, robust hardware, auto-optimization tools, and pre-set methods simplify routine analysis
- High matrix tolerance, wide dynamic range, and effective control of interferences remove uncertainty when analyzing complex samples
- Fast setup and ease-of-use improve workflow efficiency

Agilent 7900 Series ICP-MS

A new dimension in quadrupole ICP-MS

- 10x higher matrix tolerance, 10x wider dynamic range, and 10x better S/N, with software so powerful it can write your methods for you
- Matrix tolerance extends into the tens of % TDS range and linear dynamic range up to 11 orders of magnitude
- 7900 ICP-MS delivers superior data quality whatever your application

Agilent 8800 Triple Quadrupole ICP-MS

Transforming ICP-MS technology

- The 8800 Triple Quadrupole ICP-MS handles even the most difficult samples and applications with ease
- With MS/MS, the 8800 unlocks the potential of reaction cell chemistry to remove spectral interferences
- Greater accuracy and more consistent results, particularly in complex matrices

Atomic Absorption (AA) Spectrometers

Extend your productivity, performance, and output boundaries

- Agilent AA instruments for routine analysis where reliability and simple operation are vital
- World's fastest flame AA, most sensitive furnace AA, with unbeaten ruggedness and user-friendly software
- Agilent AA gives you answers you can trust

Agilent 4200 MP-AES

The next generation of proven MP-AES

- The safer, cost-efficient 4200 MP-AES runs on air, not combustible gases
- Perform unattended analysis on a broader range of a samples while benefitting from the lowest cost of ownership
- Higher sensitivity, detection limits down to sub-ppb, and faster than flame AA

FEATURED PRODUCTS

The Agilent OneNeb nebulizer improves performance and simplifies operation

The OneNeb nebulizer is an inert, high-efficiency universal nebulizer that is virtually indestructible. OneNeb has superb tolerance to high levels of dissolved solids and most ICP-OES sample matrices, including aggressive acids, hydrofluoric acid digests, and organic solvents.

It is a direct replacement for most other nebulizers, including the conventional glass concentric and inert types used with PerkinElmer ICP-OES instruments, such as GemTip and GemCone. OneNeb is also compatible with most conventional glass cyclonic and inert spray chambers. The OneNeb is rugged and durable with a user-replaceable sample capillary, and is competitive in price with conventional concentric nebulizers.

OneNeb also simplifies method development by solving the challenge of nebulizer selection. Its superb performance with most samples matrices means that you only need OneNeb. This lets you focus on delivering results you can have confidence in, and eliminate system shutdown to swap out the nebulizer when switching between different sample types.

The second-generation Agilent OneNeb nebulizer (8003-0951) improves performance compared to glass concentric and inert types in PerkinElmer Optima ICP-OES instruments.

Improved sensitivity and precision

The OneNeb uses Flow Blurring nebulization, rather than the traditional venturi effect. This creates a fine aerosol with a narrow size distribution, where most droplets are $< 10 \mu\text{m}$, enhancing efficiency. With efficient operation over a much wider range of flow rates, OneNeb is up to four times as sensitive as other nebulizers.

The fine aerosol created by OneNeb is also more efficiently desolvated and excited in the plasma, which helps to improve precision, typically less than 1% RSD even at low sample flow rates.

Comparing sensitivity response curves for different nebulizers on a PerkinElmer Optima 8000 ICP-OES. While each nebulizer needs different conditions to achieve optimum sensitivity, Agilent OneNeb provides better sensitivity at all gas flow rates.

Lower detection limits

The tables show detection limits achieved for 5% NaCl using OneNeb with the PerkinElmer Optima 7300 DV ICP-OES. OneNeb improves sensitivity, reduces detection limits, and runs for longer due to reduced blockage when measuring challenging samples that have higher TDS.

With Axial View

Nebulizer Type	Tl 190.800 (nm)	As 193.696 (nm)	Se 196.026 (nm)	Pb 220.353 (nm)

GemTip	0.8	2.7	0.2	6.2
VeeSpray	1.3	4.7	0.4	4.2

Concentrations in µg/L

Superior TDS tolerance and long-term stability

OneNeb is highly tolerant of dissolved solids, and so you can easily run samples that might cause blockage with conventional nebulizers, such as estuarine water or brine. OneNeb is also highly stable over long-term measurements, with excellent chemical resistance.

FEATURED PRODUCTS

The Multimode Sample Introduction System enables simultaneous vapor generation to improve performance and productivity

The Agilent Multimode Sample Introduction System (MSIS) enables simultaneous determination of routine elements using conventional nebulization, and the environmentally sensitive elements, including As, Se, and Hg, using hydride generation, with the same setup.

When used with PerkinElmer ICP-OES systems, the Agilent MSIS (8003-0817) enables simultaneous determination of routine and hydride elements using the same setup. This improves productivity and enables low ppb detection limits for hydride-forming elements.

Save time and eliminate changeover

With a choice of three modes (conventional nebulization, hydride only, or simultaneous hydride and conventional nebulization) routine elements can be determined using the same setup as hydride elements, eliminating changeover. This is more convenient and economical as it avoids the need to measure the hydride-forming elements in a separate measurement using a dedicated hydride system. This also saves time and simplifies your sample analysis workflow by eliminating the need for a second sample digest with prereduction of the sample specifically for hydride determinations.

High performance

MSIS delivers significantly better performance for environmentally sensitive elements, including As, Se, Hg, and other hydride-forming elements, compared to conventional nebulization. This is due to MSIS thin-film hydride technology, which enables low ppb detection limits for these elements.

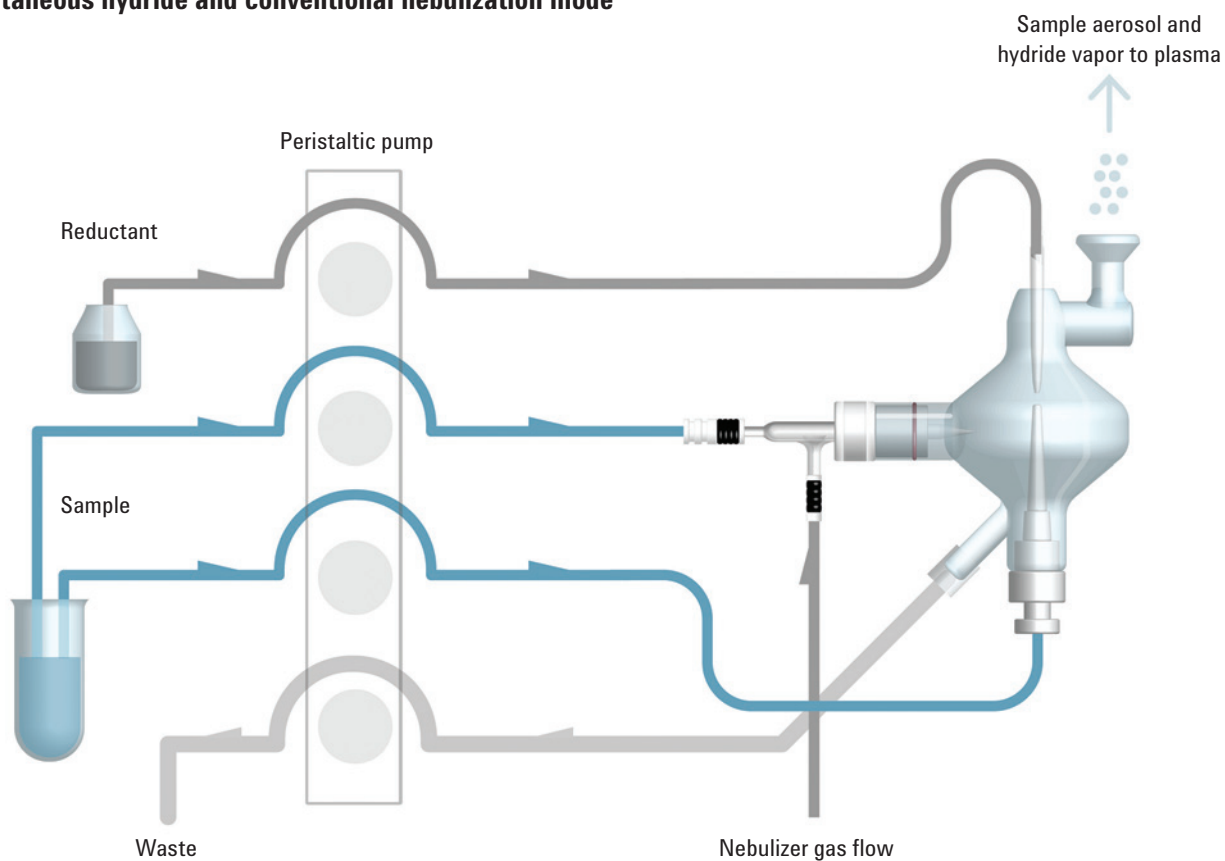

The table shows detection limits achieved using MSIS with the PerkinElmer Optima 7300 DV ICP-OES. Working in simultaneous mode, detection limits for As, Se, and Hg were improved to low ppb levels, without affecting detection limits for the other elements measured using a concentric nebulizer.

Element/Wavelength (nm)	Measured with glass concentric nebulizer in nebulization mode	Measured with glass concentric nebulizer in simultaneous mode

Operating principle of the MSIS

Simultaneous hydride and conventional nebulization mode

Agilent MSIS is based on a conventional glass cyclonic spray chamber, fitted with vertically opposed tubes in the center. Routine samples are introduced through the nebulizer in the usual manner. To enable determination of hydride- or vapor-forming elements such as As, Se, or Hg, the sample and reductant are introduced through the vertically opposed tubes. The volatile hydride species created by the reactions are stripped from the mixed solution and swept into the plasma with the sample aerosol, enabling simultaneous determination with conventional nebulization.

ICP-OES SUPPLIES

ICP-OES Torches

Available in a wide range of styles from 0 to 3 slots, depending on instrument and application needs. The slots in the side of the torch allow the plasma to be viewed through the slot and not the quartz. This ensures the best performance, while maintaining optimum shielding of the plasma from entrained air. Torches without slots are recommended for fusions and high TDS samples. One-slot torches are the standard torch for aqueous solutions. Three-slot torches are typically used for organic analysis.

ICP-OES torch, demountable, 1-slot, 8003-0344

ICP-OES torch, demountable, 1-slot, 8003-0346

ICP-OES torch, demountable, 3-slot, 8003-0347

ICP-OES torch, demountable, short, 8003-0348

O-ring kit, 8003-0360

O-ring kit, for vertical torch 8003-0361

Torches and Supplies

AGILENT SUPPLIES FOR PerkinElmer ICP-OES

TIPS & TOOLS

Alumina injectors are corrosion-resistant to all mineral acids, including HF and aqua regia, but they can also be used with less volatile organic solvents, e.g., xylene. The 2.0 mm id alumina injector is the standard injector, but a range of other sizes are available.

TIPS & TOOLS

Quartz injectors are recommended for organic solvents and non-HF matrices. Use narrow-bore injectors for more volatile organic solvents such as gasoline.

Torch Injectors

Instrument	Description	Similar to OEM Part No.	Agilent Part No.
Optima 2x00/4x00/5x00/7x00/8x00	Tracey, single-pass, cyclonic spray chamber for high-sensitivity analyses, 50 mL, borosilicate glass, O-ring-free	N0775351	8003-0329
Optima 2x00/4x00/5x00/7x00/8x00	Twister, double-pass, cyclonic spray chamber with helix nebulizer seal, 50 mL, borosilicate glass, O-ring-free	N0775352	8003-0330
Optima 2x00/4x00/5x00/7x00/8x00	Tracey, single-pass, TFE cyclonic spray chamber for high-sensitivity analyses, with helix nebulizer seal, 50 mL, inert (HF-resistant), O-ring-free	N0777496	8003-0331
Optima 2x00/4x00/5x00/7x00/8x00	Cyclonic spray chamber adapter	N0770614	8003-0332
Optima 2x00/4x00/5x00/7x00/8x00	Drain cap assembly, for drain bottle assembly	N0690271	8003-0333
Optima 2x00/4x00/5x00/7x00/8x00	Scott spray chamber assembly made from corrosion-resistant Ryton material, inert to most mineral acids including HF, aqua regia, and most organic solvents; helps to minimize pulsation from the peristaltic pump	N0770357	8003-0334
Optima 2x00/4x00/5x00/7x00/8x00	End cap, allows use of concentric nebulizers with Scott spray chamber	N0680504	8003-0335
Optima 2x00/4x00/5x00/7x00/8x00	Spray chamber drain fitting with tubing and drain adapter, to pump out waste solution through spray chamber drain (does not include peristaltic pump tubing)	N0690268	8003-0457
Optima 2x00/4x00/5x00/7x00/8x00	Tubing, PTFE, 1 mm id, for spray chamber drain, per meter, 12/pk	N8221152	8003-0460
Optima 2x00/4x00/5x00/7x00/8x00	Tracey single-pass, cyclonic spray chamber for high-sensitivity analyses, 50 mL, borosilicate glass, with bung fitting for nebulizer	N0776052	8003-0462
Optima 2x00/4x00/5x00/7x00 DV/8x00	Nebulizer adaptor, 16/6, for spray chambers that have a bung fitting for the nebulizer, not compatible with spray chambers that use the Helix seal	N0776006	8003-0953
Optima 5/7/8x00	End cap O-ring, for spray chamber with type A/C/K nebulizers	09902033	8003-0463

Multimode Sample Introduction System (MSIS),
8003-0817

Scott spray chamber assembly, 8003-0334

End cap, for concentric nebulizers
with Scott spray chamber, 8003-0335

AGILENT SUPPLIES FOR PerkinElmer ICP-OES

Top: Window, radial, 8003-0472
Bottom: Window, axial, 8003-0385

Window tube, 8003-0386

O-ring, for dual-view radial purge tube, 8003-0388

O-ring for dual-view axial purge window, 8003-0389

O-ring for torch clamp on vertical torch module, 8003-0390

O-ring for dual-view radial purge tube, 8003-0391

O-ring for dual-view axial purge window, 8003-0392

Purge Extension Windows

The axial view purge extension window fits into the purge extension between the torch and the optics.

The radial view purge extension is a replaceable tube that fits into the mount between the torch and the optics for the radial view.

Instrument	Description	Similar to OEM Part No.	Agilent Part No.
Optima 2x00/7000/8000	Window, dual-view, axial, quartz	09992731	8003-0383
Optima 2x00/7000/8000	Window tube, dual-view, radial, short tube, quartz	N0690672	8003-0384
Optima 3x00/4x 00/5x00/7100/7200/7300 DV/8300	Window, dual-view, axial, quartz	N0771116	8003-0385

AGILENT SUPPLIES FOR PerkinElmer ICP-MS

Fitting, male barb, CTFE, 8003-0502

Fitting, female barb, CTFE, 8003-0503

Sample capillary, PTFE, 8003-0504

Union, CTFE, for PFA-ST nebulizer, 8003-0506

Nebulizers and Supplies

Description	Similar to OEM Part No.	Agilent Part No.
EzyLok kit for nebulizer gas side arm Includes EzyLok connector for 4 mm tubing, EzyLok 6 mm hose adaptor and nebulizer hose clip.	N0777413	9910127800
Cross-Flow II replacement GemTips, constructed of PEEK for maximum corrosion resistance, orifice sizes color-coded, argon, 0.23 mm (0.009 inch) ruby red, sample, 0.34 mm (0.013 inch) clear sapphire	N8120515	8003-0484
Ferrule kit, for Cross-Flow II nebulizer Includes sample and argon ferrules, suits all GemClean Cross-Flow II nebulizers after September 1998.	N0680612	8003-0486
Ferrule, argon, for Cross-Flow II nebulizer	09920515	8003-0485
Ferrule, sample, for Cross-Flow II nebulizer, suits all GemClean Cross-Flow II nebulizers after September 1998	09920518	8003-0488
Sample inlet (UniFit) fitting for U-series concentric glass nebulizer, 0.75 mm id x 700 mm x 1/16 inch od	N0774080	8003-0493
Clip, for nebulizer pressure hose, 10/pk	N0773197	8003-0495
Fitting, male barb, chlorotrifluoroethylene (CTFE), for sample inlet fitting used with type A/C/K nebulizers	N8145017	8003-0502
Fitting, female barb, chlorotrifluoroethylene (CTFE), for sample inlet fitting used with type A/C/K nebulizers	N8145018	8003-0503
Sample capillary, PTFE, 0.062 inch od, 0.020 inch id, for sample inlet fitting used with type A/C/K nebulizers	CT-0022T-10	8003-0504
Union, CTFE, for PFA-ST nebulizer, connects to UltraClean sampler probe	N8122355	8003-0506

Spray Chambers and Supplies

Spray chamber drain fitting, 8003-0501

Spray chamber, baffled, glass, 8003-0515

O-ring, for baffled quartz cyclonic spray chamber, 8003-0516

Spray chamber, baffled, glass, 8003-0514

Instrument	Description	Similar to OEM Part No.	Agilent Part No.
ELAN 9000/6xX00/DRC/NexION	Spray chamber drain fitting, 24 inch x 0.030 inch id, 0.062 inch od	N8145015	8003-0501
ELAN DRC/DRC Plus/DRC II	Spray chamber, baffled, glass, cyclonic, with ball-joint, for ball-joint injectors	N0773196	8003-0515
ELAN 9000/6xX00/DRC/NexION	O-ring, for baffled quartz cyclonic spray chamber (PTFE O-ring type) with ball-joint	09210011	8003-0516
ELAN 9000/6xX00/DRC/NexION	End cap, for Cross-Flow II nebulizer, suits all GemClean Cross-Flow II nebulizers after September 1998	N8122239	8003-0487
ELAN	Spray chamber with auxiliary gas port, 7 mm baffle, quartz, cyclonic, drain line included, connects directly to ESI injectors	N0777034	8003-0519
ELAN 9000/6x00/5x00/DRC-e	Spray chamber, glass, cyclonic, O-ring-free	N0775350	8003-0520
ELAN 9000/6x00/5x00/DRC-e	Spray chamber, water-cooled, glass, cyclonic, O-ring-free	N0775354	8003-0521
ELAN 9000/6x00/5x00/DRC-e	Connector, EzyLok, for jacketed spray chamber	N0774101	8003-0496
NexION/ELAN 9000/6x00/5x00/DRC-e	Scott spray chamber, HF-resistant	N8120124	8003-0522
NexION/ELAN 9000/6x00/5x00/DRC-e	O-ring, large, for Scott spray chamber	WE013060	8003-0523
NexION/ELAN 9000/6x00/5x00/DRC-e	Retaining ring, for Scott spray chamber	WE014081	8003-0524
ELAN 9000/6x00/DRC	Mounting for cyclonic spray chamber	WE014034	8003-0588
NexION	Drain tubing, 1/16 inch od, 0.038 inch id PTFE tubing	02506495	8003-0605
NexION	Spray chamber, baffled, glass, cyclonic, with ball-joint, for ball-joint injectors	N8145014	8003-0514
NexION	Spray chamber, high purity, quartz, cyclonic, O-ring-free, provides excellent sensitivity and stability with low background	N8145120	8003-0517

TIPS & TOOLS

Alumina injectors are compatible with twist-type and cassette torch mounts. They are corrosion-resistant to all mineral acids, including HF and aqua regia, but can also be used with less volatile organic solvents, e.g., xylene. The 2.0 mm id alumina injector is the standard injector, but a range of other sizes are available.

TIPS & TOOLS

Quartz injectors are compatible with twist-type and cassette torch mounts. They are recommended for organic solvents and non-HF matrices. Use narrow-bore injectors for more volatile organic solvents such as gasoline.

Instrument	Description	Similar to OEM Part No.	Agilent Part No.
ELAN DRC-e/ 9000/6x00/5000	Injector support adapter, twist-type, for corrosion-resistant torch and Rytan Scott spray chamber and twist-type torch mounts before April 2005	N8122007	8003-0545
ELAN DRC-e/ 9000/6x00/5000	Injector support adapter, twist-type, assembled with O-rings, for corrosion-resistant torch and Rytan Scott spray chamber and twist-type torch mounts before April 2005	N8120116	8003-0546
NexION/ELAN DRC-e/ 9000/6x00/5000/500	O-ring kit, for injector support adapter	N8120100	8003-0547
NexION/ELAN DRC-e/ 9000/6x00/5000/500	Injector support adapter, for cassette-type non-ball-joint injectors	W1013266	8003-0548
NexION/ELAN DRC-e/ 9000/6x00/5000/500	O-ring, for injector support adapter, internal, twist/cassette-type, 4/pk	09210011	8003-0549
NexION/ELAN DRC-e/ 9000/6x00/5000/500	O-ring, for injector support adapter, external (large) cassette-type	W1013545	8003-0550
NexION/ELAN DRC-e/ 9000/6x00/5000/500	O-ring, for injector support adapter, external, twist/cassette-type	09210012	8003-0551
ELAN 9000/6x00/DRC	Fitting, Swagelok, stainless steel nut, 1/4 inch	09903464	8003-0593
ELAN 9000/6x00/DRC	Tube fitting	09903465	8003-0594

AGILENT SUPPLIES FOR PerkinElmer ICP-MS

Torch, demountable, quartz, 8003-0552

Torch, demountable, quartz, high-efficiency, 8003-0553

Torches and Supplies

Instrument	Description	Similar to OEM Part No.	Agilent Part No.
NexION/ELAN	Torch, quartz, demountable, used with a fully replaceable sample injector made of fused alumina, quartz, or sapphire (supplied separately)	N8122006	8003-0552
ELAN 9000/6x00/DRCs/NexION	Torch, demountable, quartz, high-efficiency, for reduced argon gas flow, requires the high-efficiency torch kit for first-time installation	W1008384	8003-0553
ELAN 9000 and 6x00	Torch kit, high-efficiency Includes high-efficiency torch and flow restrictors to enable operation with reduced argon gas flow.	W1007468	8003-0554
NexION/ELAN 9000/6x00/DRCs	Torch alignment tool, to align the torch in the load coil	WE015554	8003-0555
NexION	Mount, for cassette torch, excludes demountable torch and injector	W1037485	8003-0556
ELAN 9000/6x00/DRC	O-ring kit, for type II torch	09903094	8003-0591

Sampler cone, nickel, large-orifice, 8003-0571

Skimmer cone, nickel, 8003-0572

Skimmer cone, nickel, 1.1 mm orifice, 8003-0573

Skimmer cone, nickel, 0.9 mm orifice, 8003-0574

Hyper skimmer cone, 8003-0579

Screw, for hyper skimmer cone, 8003-0581

O-ring, for sampler cone, 8003-0582

O-ring, for skimmer cone, 8003-0583

Tool, for cone removal, 8003-0586

Interface Cones and Supplies

Instrument	Description	Similar to OEM Part No.	Agilent Part No.
NexION	Sampler cone, nickel, large-orifice, for high and low sample-uptake conditions	W1033612	8003-0571
NexION	Skimmer cone, nickel	W1026356	8003-0572
NexION	Sampler cone, platinum	W1033614	8003-0575
NexION	Skimmer cone, platinum	W1026907	8003-0576
NexION	Hyper skimmer cone	W1033995	8003-0579
NexION	O-ring, for hyper skimmer cone	09902123	8003-0580
NexION	Screw, for hyper skimmer cone	09919737	8003-0581
NexION	Sampler gasket for hyper skimmer cone	W1040148	8003-0584
NexION	Tool, for cone removal	W1034694	8003-0585
ELAN 9000/6x00/DRC	Sampler cone, nickel, 1.1 mm orifice, not compatible with NexION	WE021140	8003-0573
ELAN 9000/6x00/DRC	Skimmer cone, nickel, 0.9 mm orifice, not compatible with NexION	WE021137	8003-0574
ELAN 9000/6x00/DRC	Sampler cone, platinum, not compatible with NexION	WE027802	8003-0577
ELAN 9000/6x00/DRC	Skimmer cone, platinum, not compatible with NexION	WE027803	8003-0578
ELAN 9000/6x00/DRC	O-ring, for sampler cone, 5/pk	N8120511	8003-0582
ELAN 9000/6x00/DRC	O-ring, for skimmer cone, 5/pk	N8120512	8003-0583
ELAN 9000/6x00/DRC	Tool, for cone removal	WE017142	8003-0586

TIPS & TOOLS

Nickel interface cones provide the most economical operation as it is a rugged and long-lasting material. They are recommended for the majority of sample types.

Platinum interface cones provide better resistance to chemical attack and are required for analysis of aggressive acids (e.g. hydrofluoric acid) and other more corrosive sample types.

AGILENT SUPPLIES FOR PerkinElmer ICP-MS

Ion lens, Series II, 8003-0564

Ion Lenses

Instrument	Description	Similar to OEM Part No.	Agilent Part No.
ELAN 9000/6x00/DRCs manufactured after January 1998	Ion lens, Series II	WE018034	8003-0564
ELAN 9000/DRCs manufactured after April 2005	Cassette lens shadow stop	W1013361	8003-0566

Detectors

Instrument	Description	Similar to OEM Part No.	Agilent Part No.
NexION	SimulScan dual-stage detector	N8145000	8003-0561
ELAN 9000/6x00/DRCs* manufactured prior to April 2005	SimulScan dual-stage detector, original	N8125001	8003-0562
ELAN 9000/6x00/DRCs manufactured after April 2005	SimulScan dual-stage detector, improved	N8125050	8003-0563

Sample Introduction Kits

Description	Similar to OEM Part No.	Agilent Part No.
Sample introduction kit (PFA-Platinum), for NexION, HF-resistant. Recommended for analysis of semiconductor-grade chemicals and Si wafer samples. Includes 2 PFA MicroFlow nebulizers, PFA endcap with additional gas port, PFA spray chamber, Pt injector, Pt Shield, and quartz torch.	N8142001	8003-0511
Sample introduction kit (PFA-Sapphire), for NexION, HF-resistant. Provides a chemically inert and clean introduction system. Includes a PFA-ST nebulizer, PFA endcap with additional gas port, PFA spray chamber, Sapphire injector, Pt Shield, and quartz torch.	N8142002	8003-0512
Sample introduction kit (HF-resistant), for NexION. Includes Scott spray chamber with a Cross-Flow II nebulizer, 2 mm alumina injector, injector support adapter, O-rings, tubing, and connectors.	N8140507	8003-0513

TIPS & TOOLS

For a listing of supplies for AS-90/90A/90plus/91/93plus/S10 Autosamplers, please see the *Agilent supplies for PerkinElmer AA spectrometers catalog*, publication number 5991-6431EN

RF load coil assembly, 8003-0559

RF Load Coil

Instrument	Description	Similar to OEM Part No.	Agilent Part No.
NexION/ELAN 9000/6x00/DRCs	RF load coil assembly	WE021816	8003-0559

Peristaltic Pump Tubing

Instrument	Description	Similar to OEM Part No.	Agilent Part No.
NexION 3000/X/D	Peristaltic pump tubing, Santoprene, 1.30 mm, gray/gray, 12/pk	N0777444	3710044300
ELAN 9000/6x00/DRC	Peristaltic pump tubing, 0.44 mm id, PVC, green/yellow, flared end, 6/pk	N0773113	8003-0595

Miscellaneous Supplies

Instrument	Description	Similar to OEM Part No.	Agilent Part No.
ELAN 9000/6xX00/DRC/NexION	ICP-MS chiller coolant mix, 1L bottle	WE016558	8003-0474
NexION/ELAN 9000/6x00/DRCs and ELAN 5000As manufactured after September, 1992	Power amplifier tube, ceramic	N0695477	8003-0560
ELAN 9000/6xX00/DRC	Vacuum pump fluid for Leybold roughing pump	N8122004	8003-0567
ELAN 9000/6xX00/ DRC	Vacuum pump fluid, for Varian roughing pump	N8122308	8003-0568
NexION	Fomblin, perfluoropolyether (PFPE), GV80 vacuum pump fluid	N8145003	8003-0569
	Silicone grease, high vacuum, for vacuum system O-rings	09905147	8003-0570

Why you need Agilent Certified Reference Materials

Agilent inorganic, metallo-organic and biodiesel Certified Reference Materials (CRMs) are manufactured in an ISO 9001, ISO Guide 34 facility and certified in an ISO/IEC 17025 testing laboratory, so you can be sure you're getting the industry's highest quality standards. Agilent CRMs are suitable for AA, MP-AES, ICP-OES, and ICP-MS, and other elemental analysis techniques. You can maximize accuracy and productivity in your lab by using Agilent CRMs with Agilent supplies for your PerkinElmer systems.

All Agilent spectroscopy CRMs are certified using the National Institute of Standards and Technology (NIST) high-performance spectroscopy protocol. Both the certified concentration and uncertainty values are traceable to NIST Standard Reference Materials to ensure the highest accuracy and complete traceability.

Trace impurities are assayed using an Agilent ICP-MS and reported on the Certificate of Analysis for ICP-OES/ICP-MS standards (trace impurities are not reported for AA standards). The standards have a long shelf life, up to 18 months, supported by long-term stability studies performed as part of the requirement for Guide 34 accreditation.

With Agilent CRMs, your laboratory is assured of quality, purity, and consistency. Find Agilent CRMs for your applications at www.agilent.com/chem/spectroscopystandards

WHY DO YOU NEED AGILENT CRMS?

- Manufactured in an ISO 9001, ISO Guide 34 facility, and certified to ISO/IEC 17025
- Made using only high-purity raw materials, acids, and 18 MOhm de-ionized water
- Directly traceable to NIST Standard Reference Materials
- Assayed with a NIST high-performance ICP-OES method and purity confirmed by ICP-MS
- Certification ensures higher accuracy and lower uncertainty
- Packed in pre-cleaned HDPE bottles with tamper-evident seals

The Agilent Quality Promise

Agilent operates under a Quality Management System registered to ISO 9001:2008 and places the greatest emphasis on product quality and customer satisfaction. Agilent supplies for PerkinElmer instruments are guaranteed to be fully compatible with the equipment for which they are specified. These products are designed and manufactured to meet critical specifications set by Agilent engineers to ensure optimal fit and performance with your PerkinElmer instruments.

Visit **Declaration of Performance**

Certified Performance

All Agilent spectroscopy CRMs include a Certificate of Analysis that confirms ISO conformity and traceability, actual concentration, measurement uncertainty, and other quality control measures.

Agilent Technologies

CERTIFICATE OF ANALYSIS

Agilent Product Name: Copper Standard: 1000 µg/mL Cu in 5% HNO₃
Agilent Part No: 5190-8348
Lot No: Sample

Product Specifications

Analyte	Starting Material	CAS #	Matrix	Certified Concentration
Cu	Cu	7440-50-8	5% HNO ₃	994 ± 2 µg/mL (w/v)
				984 ± 2 µg/g (w/w)

Intended Use: This solution is intended for use as a certified reference material or calibration standard for inductively coupled plasma optical emission spectroscopy (ICP-OES), inductively coupled plasma mass spectrometry (ICP-MS), atomic absorption spectroscopy (flame AAS or GFAAS), microwave plasma atomic emission spectroscopy (MP-AES), x-ray fluorescence spectroscopy (XRF), and other techniques for elemental analysis.

Certification & Traceability: This CRM was manufactured under a quality management system that is accredited to ISO Guide 34, ISO/IEC 17025, and registered to ISO 9001. This CRM was prepared to a nominal concentration of 1000 µg/mL by gravimetric methods using 99.999% pure copper (Cu) metal dissolved in high purity nitric acid (HNO₃) and diluted with ASTM Type I Water. The balances used in the preparation of this CRM are calibrated regularly with traceability to NIST. All volumetric dilutions are performed in Class A calibrated glassware. The certified concentration and uncertainty were determined using the "High Performance ICP-OES" protocol developed by NIST and both the certified concentration and uncertainty values are traceable to NIST SRM 3114, lot #011017. The uncertainty associated with the certified concentration represents the expanded uncertainty at the 95% confidence level using a coverage factor of k=2.

Uncertified Values: Agilent ICP-MS was used to determine trace metal concentrations for this product (nd = not determined).

Trace Concentrations (µg/L)															
Ag	<0.5	Ce	<0.2	Gd	<0.2	Lu	<0.2	Pb	<1	Se	<2	Tl	<0.5	Al	<2
As	<2	Co	<1	Ge	0.989	Mg	<5	Pd	<0.5	Si	<100	Tm	<0.2	Ar	<2
Au	<0.5	Cr	<0.5	Hf	<0.2	Mn	<1	Pr	<0.2	Sm	<0.2	U	<0.5	Br	<5
B	<5	Cu	Major	Ho	<0.2	Na	<25	Rb	<0.5	Sr	<1	W	<0.5	Ca	<25
Be	<1	Dy	<0.2	In	nd	Nb	<0.5	Re	<0.2	Ta	<0.5	Y	<0.5	Cd	<0.5
Bi	<0.5	Er	<0.2	Ir	<0.2	Nd	<0.2	Rh	<5	Tb	<0.5	Yb	<0.2	Cl	<25
B	<0.2	Eu	<0.2	K	<25	Ni	9	Ru	<0.5	Te	<1	Zn	<2	Cu	<25
Ce	<25	Fe	<10	La	<0.5	Os	<0.5	Sb	<0.5	Th	<0.5	Zr	<0.5	Ga	<0.5
Cd	<0.5	Ga	<0.5	Li	<2	P	<100	Sc	<5	Ti	<2	Hf	<0.5		

Instructions for Use: Agilent Technologies recommends that the solution be thoroughly mixed by repeated shaking or swirling of the bottle immediately prior to use. To achieve the highest accuracy the analyst should: (1) use only pre-cleaned containers and transferware; (2) avoid pipetting directly from the CRM's original container; (3) use a minimum sub-sample size of 500 µL; (4) make dilutions using calibrated balances or certified volumetric class A flasks and pipettes; (5) dilute to volume using the same matrix as the original CRM; and (6) never pour used product back into the original container. The solution should be kept tightly capped. Store at controlled room temperature per USP 35 (10.30.60). Do not freeze, heat, or expose to direct sunlight. Minimize exposure to moisture or high humidity.

Period of Validity: Agilent Technologies ensures the accuracy of this solution until the expiration date shown below, provided the instructions for use are followed. During the period of validity, the purchaser will be notified if this product is recalled due to any significant changes in the stability of the solution.

Date of release: 9 February 2015
Date of expiration: 31 August 2016

Also running Agilent systems?

Then you need the Agilent spectroscopy supplies catalog. This provides comprehensive information on our portfolio of spectroscopy supplies for Agilent systems. This catalog is designed to help you easily find the products and information you need, making it an essential resource providing a wealth of information, including:

- Product photos and ordering information
- Selection guides and applications
- Compatibility charts
- Troubleshooting tips
- Maintenance schedules
