## Belmont X-Ray Systems

### Phot-XII S Model 505 Intra oral x-ray \$6,795.00

Small 0.4mm x 0.4mm focal spot for the sharpest images  
 New wall plate set up with multiple mounting options  
 High frequency DC x-ray, reduces radiation  
 60 or 70Kv, 3 or 6 mA, for digital sensors, or plates or film  
 Programmable, self calibrating, ultra light tube-head  
 Radiation dose display for sensor set up and patient information  
 Now with long cone included for sharper sensor images with less patient dose

### Bel-Cypher Pro Panoramic X-ray system \$45,695.00

- Tomosynthesis image error correction capability
- Motorized vertical drive
- Small compact foot print
- Simple operation
- Laser positioning
- New graphic interface
- Panorama, bitewing and TMJ
- New super resolution CMOS sensor
- 5 year warranty

Panoramic orbit can be adjusted for anterior teeth and right/left posterior teeth regions respectively, enabling a corrected image acquisition corresponding to each patient's dentition. \*Note that the orbit cannot be corrected after image using.

Exclusive Tomosynthesis mode can compensate for positioning errors, choosing the sharpest of 30 layers!
