# Mammotome Revolve™

Dual Vacuum-Assisted Breast Biopsy System

The Mammotome Revolve™ biopsy system is designed for accuracy, repeatability and efficiency, while staying true to your core purpose — acquiring the best quality tissue during your patient's biopsy. Advanced tissue management technology minimizes tissue handling while eliminating procedure steps to improve workflow and get your patient off the table faster.

Includes Mammotome Revolve™ Control Module,

# Mammotome Revolve™ EX

Dual Vacuum-Assisted Breast Biopsy System

The Mammotome Revolve™ EX biopsy system is the first dual vacuum-assisted breast biopsy system to enable inspection of lesion edge tissue with a flexible collection system to store multiple lesion areas. Designed for efficiency, safety and reliability, the Mammotome Revolve™ EX biopsy system improves workflow efficiency and clinical confidence.

# Mammotome® Elite

Tetherless Vacuum-Assisted Biopsy System

The Mammotome® Elite tetherless biopsy system combines vacuum-assisted biopsy tissue quality with the ease and speed of a spring-loaded core needle. The single insertion, non-firing bladed tip moves easily through tissue, minimizing time required between tissue samples while TruVac™ vacuum technology captures and transports large unfragmented tissue samples from the biopsy site to the collection cup, enabling a reliable diagnosis. The Mammotome® Elite biopsy system is the leading single insertion, tetherless VABB device available today.

# Tru-Core™ II

## Automatic Biopsy Instrument

The Tru-Core™ II instrument is a spring loaded, single stage, automatic core needle designed to fit comfortably in even the smallest of hands. The lightweight handle provides seamless control for improved targeting and sampling of ultrasound visible lesions. With a best-in-class firing speed, the Tru-Core™ II instrument can penetrate even the densest of lesions to capture quality tissue for an accurate diagnosis.

Mammotome **Confirm™**

Core Specimen Radiography System

Clinicians can verify the presence of microcalcifications during stereotactic biopsies quickly and easily with the Mammotome Confirm™ imaging system. The Mammotome Confirm™ system integrates seamlessly with the Mammotome Revolve™ biopsy device and allows for the immediate analysis of biopsy cores directly at the site of the biopsy, maximizing procedural efficiency while minimizing the amount of time the patient is on the biopsy table.

# XPERT® 40

Specimen Radiography System

Whether in the biopsy suite or the OR, nothing beats the XPERT® 40 specimen radiography system in terms of versatility and speed. The XPERT® 40 system allows clinicians to identify the finest details in the widest range of specimens in the shortest possible time. The system provides unprecedented specimen visualization with digital mammography quality. It is easy to use, offers a touchscreen option and a full suite of annotation tools.

# Neoprobe®

Gamma Detection System

The sensitivity, clinical flexibility, and ease of use of the Neoprobe® GDS have supported this vision of nuclear medicine for almost two decades. Whether used for Sentinel Lymph Node Biopsy in breast, melanoma or other cases, Radio Seed Localization of cancerous tissue in lumpectomies, or to target hyperactive parathyroid glands during parathyroidectomy, the Neoprobe® system guides surgeons to the right tissue accurately and reliably.

The Sentimag® localization platform is the first and only to enable radiation-free lesion localization and sentinel lymph node biopsy. The Sentimag® platform uses a highly sensitive reusable console and probe to accurately pinpoint proprietary magnetic seeds (Magseed®) and magnetic tracers (Magtrace®). These novel technologies are creating more possibilities for surgeons to perform breast conservation procedures.

# Professional & Patient Education

Focused on better outcomes.  
Your partner for breast interventions and surgery.

## Professional Education

Delivered by skilled professionals showcasing experienced techniques and proven methodology, our educational events provide valuable information you can use to expand your clinical expertise.

Connecting breast care experts through education and clinical evidence:

Professional Webinars

Hands-On Courses

Society & Tradeshow Events

Clinical Evidence

## Patient Education

Our breast health webinars are designed to provide valuable education for patients and caregivers. Key opinion leaders in radiology and breast surgery discuss topics that span the breast health continuum and answer the most common patient questions.

**Episode 1:** Screening Mammography

**Episode 2:** Breast Cancer Risk

**Episode 3:** Second Look Mammograms

**Episode 4:** Your Breast Biopsy

**Episode 5:** Preparing for Your Breast Surgery

**Episode 6:** Advances in Breast Cancer Surgery

## Where Do I Go For More Information?

**Website:** [mammotome.com/patient-resources-category/webinars/](https://mammotome.com/patient-resources-category/webinars/)

Service and support to optimize the lifecycle  
of your Mammotome products.

## MammoCare™ Service Agreements

You have patients waiting for answers. MammoCare™ Service Agreements are designed to reduce the risk of extended downtime and unexpected costs.

Value of a service agreement:

Next day loaner  
equipment at no cost

Equipment repair or  
replacement coverage

Manufacturer certified  
parts and technicians

## Products Covered

Mammotome Revolve™  
Biopsy System

Mammotome Elite®
