## Laerdal Airway Management Trainer

Realistic practice for developing proficiency in airway management skills

The Laerdal Airway Management Trainer realistically simulates an adult airway, and the lifelike upper torso and head can be used to demonstrate and practice intubation, ventilation and suction techniques. In addition it can be used to demonstrate upper airway bronchoscopy and bronchoscopy guided endotracheal intubation.

## Laerdal Airway Management Trainer Benefits

- Realistic representation of human anatomy, tissue, and skin
- Supports training that is directly transferable to the clinical setting
- Practical training in clearing an obstructed airway and suctioning of liquid foreign matter
- Minimal maintenance and robust design delivers cost-effective training
- Base plate mount allows stable practicing conditions
- Easy to clean and clear cleaning instructions are included
- A hard carry case provides easy transportation and safe storage

### Training features

#### Airway

- Head tilt
